HOOK YOUR DREAM

We are anglers.

Let us wet our lines, let the world stay still on our rod tips.
Let it resume spinning as we strike, as the line tightens and the rod bends.
As we resume breathing again.

Let us wet our hands reaching for the inside of the net, feel the scales on our fingers,
admiring the pattern shimmering in the sunlight.
Let us stare as it swims back where it belongs, or feed on it: different closures of the same
poetry.

Let us moor our boats, store our tackle and find our way home as we walk everybody's
world again.

GB
BKK

BKK HISTORY

Rusting hammers and crunching pliers, metal sticks everywhere. A bunch of rudimentary pieces of machinery and a grinder to sharpen edges. And smoke, a lot of it, dust scattered all around. Tangled fishing lines hanged on the walls. Water lapping on the bank in the front, as people gather on the porch to purchase fishing hooks in the small, bustling port of Poyang, China. Quite an accurate portrait of the tiny workshop overlooking the river where the 16-year-old boy of the Zhan family manufactured BKK's first hook in 1856.

It was this boy though who first penned our story. It took five generations to turn a small workshop into an organized production laboratory, and one more to make it evolve into a modern large-scale production plant, equipped with some of the most advanced machinery in the industry. We have perfected the art of hook manufacturing over the decades, through six generations of farsighted members of the Zhan family.

It was commercial hooks at the beginning, supporting the local fishermen in their everyday quest to feed their families. It soon turned into manufacturing recreational fishing hooks and transitioned into the modern era, as hand-made was replaced by machinery.

Today BKK counts on a factory employing some six hundred people, an office in Japan and an office in Shanghai managing international sales, marketing, and branding. An undevoted passion to fishing drives a committed team of anglers from Europe, China and Southeast Asia in the research, creation, and testing of what we believe are simply the best hooks you can choose, created by anglers for anglers.

That very first workshop – in ruins, partly flooded – still stands, still with its original sign reading 出售各种鱼钩 – we make every type of fishing hooks.

BKK HOOK TECHNOLOGIES

What does it take for a hook to be a well-made hook?

Most anglers would reply by mentioning sharpness and strength; bottom line is they need hooks that penetrate easily and that cannot be pulled open, and it is actually as easy as that.

However, these two apparently simple concepts hinge upon a whole array of manufacturing procedures that have been honed over time and that are at the core of hook production, in turn constituting one of the main competitive edges of each manufacturer.

All starts with a steel wire that is cut, sharpened and bent into the desired shape; through these simple steps everybody can create a hook, it is the tweaks in between that distinguish a normal hook from a great hook.

The raw material is pivotal in ensuring the proper elasticity, the grinding of the point paramount for long-lasting penetration, the forging and the heat treatment are essential to provide the proper holding power, the coating is critical to corrosion resistance, the quenching, the milling of the eye, the welding...

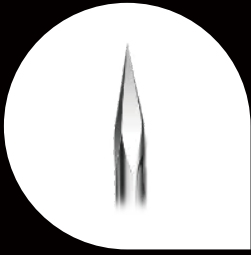

As you see, much more is involved in making great hooks and BKK controls it all: from the raw steel wire down to the finished hook, we undertake and monitor the whole manufacturing process in-house, meaning quick product development and excellent quality control.

Look closer and you will notice the difference, it's simply a BKK hook.

HAND GROUND

The BKK Hand Ground technology enables the hook to reach unprecedented levels of penetration and lightness. The sides of a traditional conical hook are ground to form a triangle sword blade. This process leaves the original needle point unaltered as the grounding is carried out from few millimeters below the point to the bend below the barb. This reduces piercing resistance, enhances hook penetration and leads to an overall lighter hook structure, allowing for the reinforcement of the most stressed parts of the hook through the application of some additional material.

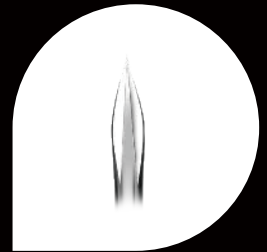

CUTTING DELTA

The design concepts of the Cutting Delta point originate from the formation of a military sword. Delta Point hooks have razor sharp tips with leading edges designed to reduce surface contact area. Such technology-obtained through cold forging-enhances the penetration performance of the hook point and the strength of the structure.

COMBAT POINT

The design of the CP hook point resembles that of an inverted T, greatly increasing the penetration performance thanks to the sharp edges of the two sides that can pierce through the hardest mouths. The central edge reinforces the structure, providing long-lasting performance even after several hook ups and when dealing with stony bottoms.

CUTTING BLADE

The design concept derives from the sharp teeth of a shark. This patented BKK hook point can penetrate hard jaw bone with ease, piercing through and sliding between the bony parts of the fish's mouth. For this reason, it performs excellently in those long-range fishing techniques and when bottom dwelling fish with developed toothy apparatus are targeted.

HOOK TECHNOLOGIES

SUPER-SLIDE

BKK Polytetrafluoroethylene (PTFE) coating enhances the penetration ability of the hook thanks to its extremely low friction coefficient. When tested, hooks with Super-Slide coating penetrate through fish's mouth with just a little bit of pressure. Furthermore, such slick surface not only eases hook ups, but it also helps sliding live baits onto the hook, prolonging their liveliness and attractiveness.

ULTRA-ANTIRUST

Launched in 2014, BKK's ultimate Ultra-Antirust coating technology takes corrosion resistance to the next level, preventing rusting up to 300 hours. Its corrosion resistance together with its hardness are the top amongst the coatings currently available on the market, allowing anglers to have sharp hooks at all time.

U-SPADE SLIP LOCK

This advanced version of the U-Spade not only maintains the vertical front groove, but it also features a series of horizontal grooves along the back of the shank. This design can keep the line securely in place and reduce the risk of loosening, thus minimizing line stress and maximizing hook performance.

SLIM RING

The BKK Slim Ring Technology allows for an easier attachment of split rings. The hook eye diameter is optimized through a series of machining operations (grinding and milling) that remove part of the inner material and align the hook eye with the shank, without affecting the strength required to land big fish.

HOOK TECHNOLOGIES

BEST PRODUCTS

BKK-RAPTOR-Z

BKK engineers were asked to design a hook to tackle the strongest, most aggressive "Monster Fish" anyone could think of. The job requirement for a hook with not only superior impaling power and high hook-up ratio, but one that could also be super strong and highly resistant to corrosion. This is how the BKK-RAPTOR-Z came to life.

GT-REX

The BKK GT-REX was developed to tackle massive Giant Trevally and Tuna on poppers. The Hand Grounded hook point of the GT-REX coupled with BKK's signature Ultra-Antirust Coating ensure sustained sharpness and penetration performance. All the details of GT-REX from the hook eye to the points have been engineered to create simply the best-performing treble hook for your saltwater popping.

MONSTER CIRCLE

BKK' s Monster Circle hooks are specifically developed to target the strongest saltwater species. It features BKK' s Ultra-antirust coating that ensures a superb saltwater corrosion performance and a super durable and sticky-sharp needle hook point for excellent penetration performance. Additionally, the inline hook point design ensures a jaw corner hook up, being for this reason ideal for C&R. These hooks are simply a must-have when targeting extremely big fish.

TITANDIVER+

The TITANDIVER+ is the ultimate evolution of the Titan series. Potentially a breakthrough in the worm hook segments, the TITANDIVER+ inherits all the features of an ordinary TITANRIDER hook – Super Slide coating, needle point, spring and silicon stopper - enhanced with a simple, intuitive and effective lead-swapping system. The system offers many different combinations to add weight to your lure as the lead can slide on the shank, stimulating the creativity of anglers in adapting it to various fishing techniques and conditions. The bottom eyelet on the weight allows for the addition of a blade to enhance the presentation of the lure.

BKK-LONEDIABLO

BKK-LONEDIABLO hooks have been developed to be used on lures like stickbaits and poppers. They embody all BKK best technologies and centennial experience. HG point ensures easy penetration, the unique design guarantees perfect hookset, and UA coating ensures enduring performance. BKK developed a fabrication process for hooks carrying our Micro Ring label. Part of this process involves manual grinding before the material undergoes cold forging. The result is a strong slim ring profile that makes for easy attachment with split rings.

HARPAX OFFSHORE

The BKK Harpax Offshore is a super heavy-duty jighead designed with a 4x wire and an inward-looking point to be able to withstand extended fights with blue water giants. The design of the bait keeper can accommodate many types of different soft plastic lures. It features a Bright Tin coating to prevent saltwater corrosion and two additional eyelets on the head.

GT-REX

ULTRA ANTIRUST

The largest treble hook that concentrates the highest technology of BKK to serve the most extreme anglers.

The purpose of GT-REX' s development is to challenge the biggest GT and Bluefin Tuna in the world on poppers and stickbaits. The design of GT-REX emphasizes superior hook-up ratio and excellent impaling power coped with strongest wires and super anti-rust feature. Processed through the most advanced heat treatment, GT-REX uses BKK-81W/V, the strongest material from BKK, to present its superior stretch power and resilience. The hook point of GT-REX adopts BKK' s finest hook point processing technology to insure its ultimate impaling power. Meanwhile, sealed hook eye and advanced anti-rust technology equip this treble with a solid and long-lasting structure.

Short welded section increases the elasticity of the hook to reduce its possibility of being pulled open.

Our fully welded Micro Ring is formed once the hook shank has undergone a special grinding process. The strength of the ring is maintained while providing a slim profile that makes attaching a split ring super easy.

HG point - BKK' s finest hook point processing technology insures the ultimate impaling power.

Deepest hook point and widest hook gap in the industry help penetration when bite occurs.

Perfectly curved hook bend maximizes strength and resilience.

GT-REX' s super sharp hook point goes into the deepest part of fish's mouth and impales its hard bones as soon as the fish swallows the lure.

The combination of curved hook point and wide hook gap minimizes giant' s chances of escape.

GT-REX

The BKK GT-REX was developed to tackle massive Giant Trevally and Tuna. The Hand Ground hook point of the GT-REX coupled with BKK's signature Ultra-Antirust Coating ensure sustained sharpness and penetration performance. All the details of GT-REX from the hook eye to the points have been engineered to create simply the best-performing treble hook for your saltwater popping.

BKK-RAPTOR-Z

When you're going after "monsters"

BKK-RAPTOR-Z incorporates the latest hook making technology and BKK's legendary hand-crafting finishes. This is a hook that was designed with only one thing in mind: to hook strong and aggressive "monster" fish and stay hooked to the very end!

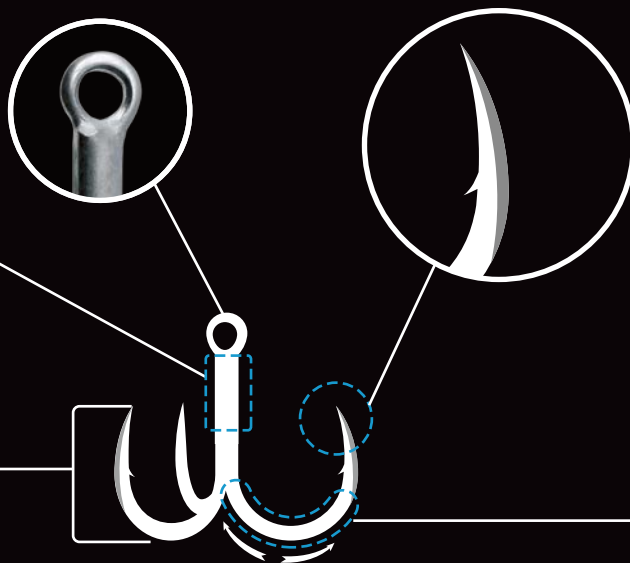

Our fully welded Micro Ring is formed once the hook shank has undergone a special grinding process. The strength of the ring is maintained while providing a slim profile that makes attaching a split ring super easy.

BKK's proud hook point processing technology insures the ultimate impaling power.

Short welded section increases the elasticity of the hook to reduce its possibility of being pulled open.

A wide gape and deep hook point design greatly reduces the chance of the hook coming off in the heat of combat.

Perfectly curved hook maximizes strength and resilience.

BKK-RAPTOR-Z

BKK engineers were asked to design a hook to tackle the strongest, most aggressive "Monster Fish" anyone could think of. The job requirement for a hook with not only superior impaling power and high hook-up ratio, but one that could also be super strong and highly resistant to corrosion. This is how the BKK-RAPTOR-Z came to life.

BKK-RAPTOR-X

Inspired by the innovative design of the BKK-RAPTOR-Z, the birth of the BKK-RAPTOR-X sets a new standard for 3X treble hooks. Lightweight and equipped with improved piercing ability and holding power, the BKK-RAPTOR-X outstands other 3X treble hooks on the market.

It comes in a wide range of sizes even down to 3#, 5#, 7#, allowing you to find the perfect match with your lure for a proper and unimpeded swimming action.

The BKK-RAPTOR-X inherited the time-tested hand-ground hook point technology from the BKK-RAPTOR-Z, enhanced by a Bright Tin coating that makes it perfect for saltwater fishing.

BKK-RAPTOR-X

The BKK-RAPTOR-X is a 3X-wire treble hook whose design is inspired by one of the best treble hooks BKK ever launched: the BKK-RAPTOR-Z.

The hook gap-shank proportions are maintained to equip the BKK-RAPTOR-X with excellent holding power, yet the hook point is slightly straightened to enhance the hook-up rate, further heightened by the slimmer profile of the wire and by the Hand-Ground processing technology.

Featuring a lighter wire and being available also in very small sizes, the BKK-RAPTOR-X can be suitable to arm smaller lures without affecting their swimming action. The lightness of the hook structure is increased also by the Hand-Ground processing, through which the hook is manually sharpened by removing material around the point.

The Bright-Tin coating of the BKK-RAPTOR-X aims at maximizing its performance in terms of saltwater corrosion resistance, being thereby suitable even for harsh saltwater environments.

A-ET-6770	3/0	5		

BKK-VIPER-41

The Viper-41 is a strong and sharp 4x treble hook designed with long and straight needle points and a very aggressive bend.

The design of the BKK-VIPER-41 stems from the experience made over the years with fast swimming diving trolling lures and surface skipping lures all around the world.

The straight point was chosen to maximize the hook-up rate when fish only hit the lure, while the aggressive shape of the bend ensures that the hook does not come off during prolonged fights or when the fish jumps out of the water.

To reduce the overall weight of the hook we shortened the welded section of the treble, thereby also providing more flexibility to the structure without affecting the overall strength.

The Viper-41 is coated in Bright Tin to resist even harsh saltwater environments and comes in a wide size range (6 to 6/0) to fit a huge array of lures, from small vibes to big SW stick baits and poppers.

FEATHERED SPEAR 21-SS NEW

The BKK Feathered Spear 21-SS feature natural feathers and reflective fibers to enhance the presentation of the lure. When added to the back of a topwater bait, crankbait or spoon, they undulate and spread when pausing, enticing more strikes imitating a minnow's tail movement. The treble is our extensively-tested Spear 21-SS-featuring a SS coating and needle point for excellent penetration. Feathers come in two different combinations: white and black/red. Binding thread is covered in epoxy resin to improve durability even after many strikes. Sizes range from 1 to 8 to cover a good range of lure sizes.

SPEAR EWG 71-SS

The SPEAR EWG-71 SS is a 1X-strength treble hook specially designed to be equipped on crankbaits of all types. The shorter shank enables this hook to sit closer to the body of your lure, minimising the impact on its swimming action and the chances of snagging. Besides, the inward-looking straight points and the EWG (Extra Wide Gap) design reduces the chance of pulled hooks. The SPEAR EWG-71 SS features BKK's signature SS coating that ensures smooth hook-ups and maintains the hooks' sharpness over time.

PLUGGING SINGLE HD

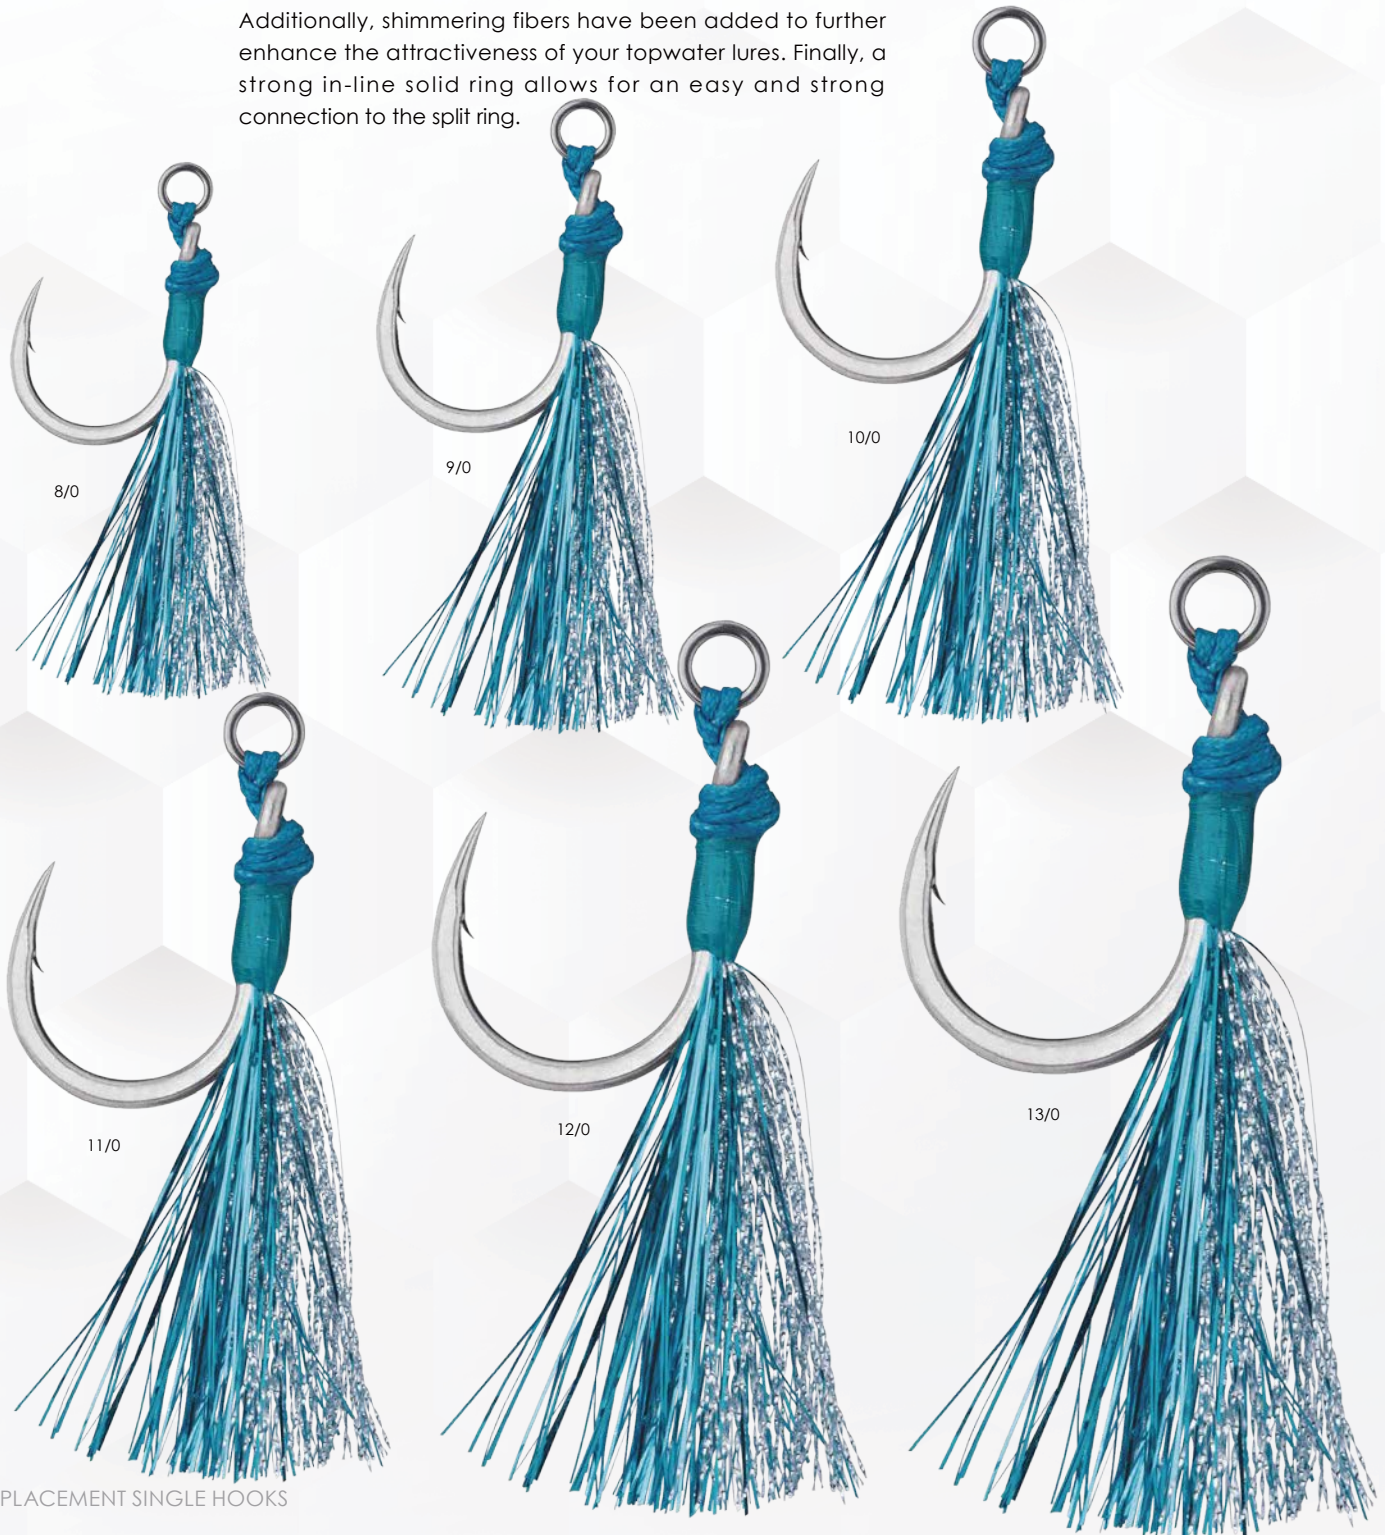

The BKK Plugging Single HD is an assist hook developed to cater to heavy-duty salt-water lure fishing and can be a performing alternative to common treble hooks, when reduction of torsional forces is most needed.

In fact, the hollow-core assist cord provides more freedom of motion to the hook, resulting in a heightened hook up ratio and in a lower chance of the hook coming off. Besides, the single hook causes less damage to the fish, allowing for an easy and fast release.

Additionally, shimmering fibers have been added to further enhance the attractiveness of your topwater lures. Finally, a strong in-line solid ring allows for an easy and strong connection to the split ring.

WORM HOOKS

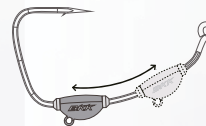

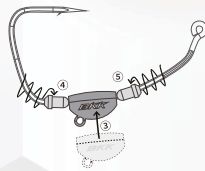

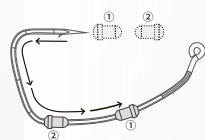

TITANDIVER+

The first member of the TITAN family was introduced just a few years ago and it soon became one of the most popular swimbait hooks for some of the biggest freshwater predator species. The fact it was bestowed the Good Design Award in 2021 in Japan was proof to us we are headed towards the right direction and it was testament to the innovative content of the product.

The more we used it, the more we thought about how to improve its set of features. In 2020 the TITANDIVER was born, stabilizing the swimming action and featuring a blade to enhance attractiveness.

In 2021 the latest generation of the TITAN series came to life: the TITANDIVER+, setting a whole new level for weedless lure fishing, from bass to bigger fresh and salt-water predators.

Needle-sharp long hook point allows for deep hook up in the mouth of predators

Stainless steel spring to secure the lure onto the hook

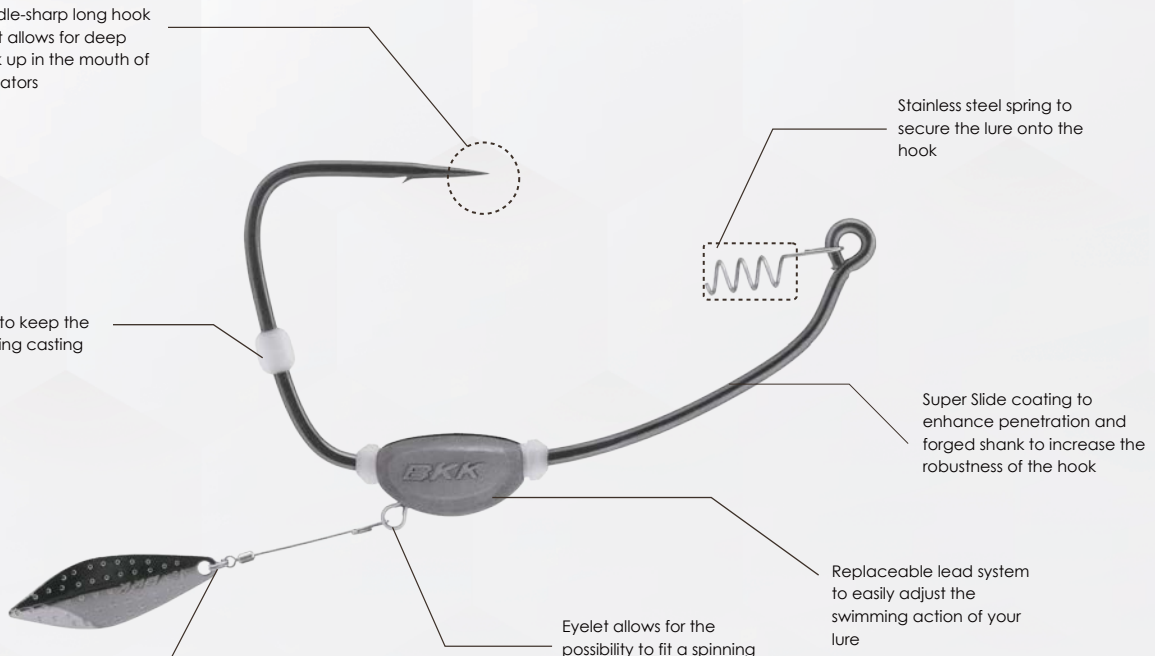

Silicone stopper to keep the lure in place during casting

Super Slide coating to enhance penetration and forged shank to increase the robustness of the hook

Replaceable lead system to easily adjust the swimming action of your lure

Eyelet allows for the possibility to fit a spinning blade

Spinning blade to enhance the presentation under water

TITANDIVER+

The BKK TITANDIVER+ is the ultimate evolution of the Titan series.

Potentially a breakthrough in the swimbait hook segments, the Diver+ inherits all the features of an ordinary TITANRIDER hook – Super Slide coating, needle point, spring and silicon stopper – enhanced with a simple, intuitive and effective lead – swapping system. The system offers many different combinations to add weight to your lure as the lead can slide on the shank, stimulating the creativity of anglers in adapting it to various fishing techniques and conditions.

The bottom eyelet on the weight allows for the addition of a blade to enhance the presentation of the lure.

TITANDIVER

Released in 2018, the TITANRIDER paved the way for a whole new generation of strong worm hooks to rig even big soft plastic lures. This upgraded weighted version named Titan Diver is just the first step along the natural development of the series.

Designed to reach deeper spots, the TITANDIVER also comes equipped with a spinning blade for extra vibration and visibility, adding enticing glare to your lure presentation.

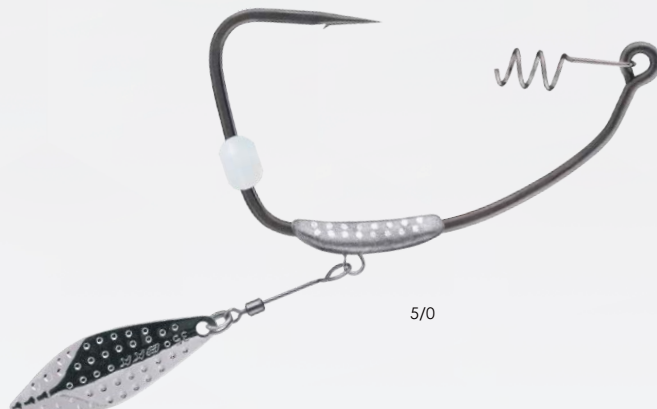

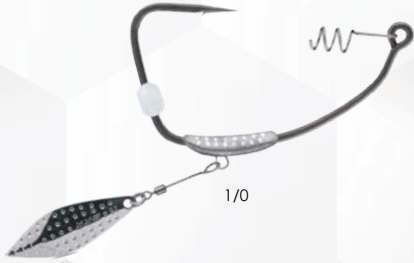

TITANDIVER

The BKK TITANDIVER is a new, upgraded version of the TITANRIDER, designed for weedless-style rigging of larger plastics. It features all the characteristics of the original TITANRIDER – a locking spring to secure the plastic lure, a silicone stopper to keep it in place and the super slide coating – boosted by the addition of a fixed lead to take the fishing action deeper in the water, scouting sunken structures where predator fish may dwell. The lead in turn features a stainless-steel ring to allow for the possible attachment of a spinning blade, improving the appeal of your lure.

TITANRIDER

BKK TITANRIDER is designed for weedless-style rigging of larger plastics like big swimbaits and tubes. A locking spring securely holds baits in place and allows angler to easily add or remove bait without damage.

The adjustable silicone stopper keeps soft plastics in place during casting whilst allowing for sliding down the hook when a fish strikes.

PREDATOR WG

The BKK Predator WG is a freshwater finesse hook used for a variety of rigs such as Wacky and Dropshot, primarily for bass fishing. The wide-gap design and the Super Slide coating significantly enhance the hook-up rate, while the micro barb makes it suitable for catch and release. Despite its slim profile, the Predator WG is strong enough to fight big prey thanks to its forged shank.

PREDATOR WG WEEDLESS NEW

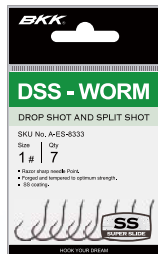

The Predator WG Weedless is the weedless version of the original Predator WG for wacky and dropshot presentations. Featuring an SS finish and needle point for improved penetration performance and a forged shank, it is equipped with a fluorocarbon weed guard engineered to prevent the hook snagging the cover while allowing it to penetrate a fish with ease when striking. The guard is securely connected to the shank of the hook through strong binding thread further covered in epoxy-resin and will keep its shape and orientation fish after fish.

HEAVY COVER NEW

The BKK Heavy Cover is developed for flipping and punching techniques. This hook is equipped with an SS finish and an extra-short needle point to ensure an excellent penetration performance and an improved point strength. A special higher-carbon steel material is used to enhance wire stiffness, coupled with a forged shank to enhance hook robustness. The stainless steel baitkeeper provides consistently straight rigging and superior holding power, and is covered in epoxy resin for improved durability. Epoxy resin finish is also applied to seal the hook eye, ideal for tying snell knots with braided lines preventing line damage and slippage. The BKK Heavy Cover is designed to endure and perform when fishing through thick layers of grass and other heavy covers.

JIGGING HOOKS

From small yet strong light-jigging to powerful deep-drop heavy-jigging applications, this series also includes top-notch components to couple our hooks with.

Solid rings, shimmering and glowing fibers and assist cords are carefully selected to match the quality of our hooks and improve their appealing appeal in the water.

SEA RANGER +

The BKK Sea Ranger+ features BKK's signature Hand Ground point, shimmering and glow fibers and super strong braided line. It is developed to target record fish on smaller jig presentations, both from shore and by boat.

REEFMASTM NP

The BKK Reef Master-NP is developed to be a high cost-performance ratio versatile jigging hook. A perfectly welded ring and BKK' s accurate forging process enhance the overall strength of the hook structure, also reinforced by a bright tin coating providing excellent corrosion resistant performance even in harsh saltwater environments. In order to ensure solid hook ups every time, this hook also features BKK' s needle sharp hook point. Last but not least, the hook features BKK' s Micro Ring technology that allows for an adequate hook eye diameter and eases the attachment of split rings, without affecting the overall strength of the hook structure.

SF REEFMASTER NP

The concept underlying the development of BKK SF Reefmaster NP jigging assist hook is to provide anglers with a quality product equipped with a high cost-performance ratio. This assist hook comes pre-tied with a high-quality 16-braided-strand assist cord for optimum strength and flexibility.

The glow binding thread on the hook helps stimulating strikes even in low visibility conditions. The hook itself also features BKK' s signature hook technologies including the micro ring technology and corrosion-resistant bright tin coating.

SF REEFMASTER HG ASSIST HOOKS

SF Reefmaster-HG hooks come pre-tied with high quality natural hair that will enhance your jigs presentation. Even during slow periods, feathered hooks have a proven capability of stimulating a response.

SF Reefmaster HG hooks are tied with a special glow thread that stimulates fish to strike. It makes the difference during dusk and dawn, but also with cloudy weather and low visibility. The braid line used for the assist is soft and extremely strong at the same time.

Natural Wave Motion

DEEP

The BKK Deep jigging hook combines the strongest high carbon steel and superior heat treatment to achieve high strength and elasticity. It also adopts BKK' s unique hand Ground point to achieve excellence in penetration. Hook shank grinding and welding minimize the diameter of the hook eye, making split ring installation much easier. The high-corrosion-resistance coating enhances the durability of the hook.

GAFF-R

LIGHT SLOW FALL

The BKK SF Gaff-R has been designed for slow jigging applications. The Delta Point technology and innovative design ensure easy hook ups, even during free fall and without main line tension.

The hooks are tied using the BKK Fluoro Core Assist Cord to minimize tangles and improve hook penetration.

Thanks to the three lengths available, SF Gaff-R can be used with all kinds of jigs.

LENTUS

LIGHT SLOW FALL

BKK SF Lentus hooks have been developed to target deep-water monsters with the slow jiggging technique. For this reason they have been designed with an heavy gauge that can stop the run of a big fish and an inturned point that reduces snags, but once set in the fish mouth won't come off during the fight.

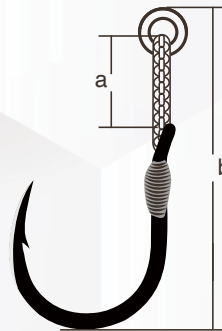

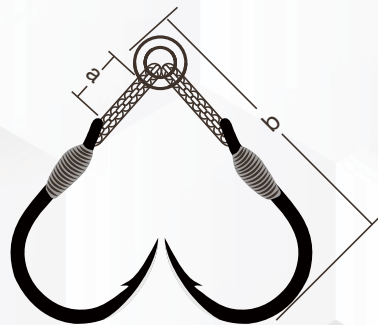

The hooks are tied using the BKK Fluoro Core Assist Cord to minimize tangles and improve hook penetration.

Thanks to the three lengths available, SF Lentus can be used with all kinds of jigs.

TROLLING HOOKS

Developed in cooperation with some of Australia, South Africa and New Zealand' s best fishing charters, this small series was developed eyeing specifically at applications in heavy saltwater trolling and freshwater trolling for large predators.

KAJIKI HD

The BKK Kajiki HD is the ultimate trolling hook for billfish designed for 50lb-80lb class tackle. It features BKK's Hand Ground hook point that delivers superb penetration performance and the Bright tin coating that performs excellently in harsh saltwater environments. The perfectly welded ring and heavy-duty forged shank further enhance the strength of the hook. Kajiki Trolling HD is the go-to trolling hook when going after the world's biggest and strongest blue water species.

JIGHEADS

Our jighead series features quality jigheads created with BKK hooks. We made sure our manufacturing process can guarantee a super solid connection with the hook, avoiding the formation of bubbles and other flaws that can cause cracks on the surface and inside the lead head. It also ensures that the weight is always consistent with what is reported on the pack. All hooks - from small finesse jigheads to saltwater heavy-duty ones - are forged to improve their ability to withstand the pull of bigger fish.

SILENT CHASER ROUND

The Round-Head Jighead is our new version of a timeless classic jighead that finds application both in fresh and in saltwater environments. The Black Nickel coating enhances its ability to resist corrosion, at the same time protecting the needle point when jigging on the bottom. The 2x-wire and medium shank allow for stealthy presentations with small baits targeting big prey.

SILENT CHASER FOOTBALL

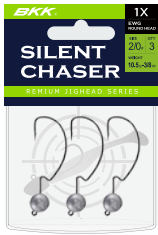

The Football-Head is a light jighead featuring a 0.8x-wire and a Cutting Delta point used for finesse presentations with small soft plastic lures on the bottom. The particular shape of the head is designed to jig over stony bottoms avoiding snags, it also slightly changes the swimming action during retrieve and the fluttering action in free sinking compared to a round-head jighead.

The hook is coated in Black Nickel to boost your stealthy presentations and to protect the hook.

Super Slide 10

SILENT CHASER-GLIDE 'N SHAKE NEW

The BKK Glide 'N Shake is engineered to combine both gliding and shaking presentations. The innovative bullet-head design allows for an optimal gliding action during the descent towards the bottom, and a flat surface on the front edge of the head makes it ideal for stand-up and shaking presentations once on the bottom. Hook size and weight are embossed on the head for easy selection. The hook features the SS coating and a needle point to ensure excellent penetration performance and a forged shank for improved resistance. The offset design eases Texas rigging soft plastics for a completely weedless presentation. Besides, the orientation of the hook eye reduces the chances of snagging as the hook - compared with an inline eye - is more likely to flip over the snag rather than leaning on one side.

SILENT CHASER-DRAGGIN' NED

NEW

jigheads

The BKK Draggin' Ned is designed specifically for Ned Rig presentations. Features include BKK's signature SS coating and a sharp needle point for enhanced penetration, and an O' Shaughnessy forged bend to maximize strength. We elaborated further on the concept of a classic Ned head by adding a series of details that make this jighead unique: a recessed eye to reduce snags and protect the knot when fishing over rocky bottoms, a baitkeeper designed to fit both elastomeric and standard soft bait compounds, and ribs on the underside of the head for increased sensitivity when dragging the bait on the bottom. The final touch is on the head, where size and weight specifications are embossed for easy selection. The Draggin' Ned comes in two different colors: matte green pumpkin and matte black for stealthier presentations. It also comes in a weedless version featuring a nylon guard. Two sizes available (1 and 1/0), weight range 1/16 - 1/4oz. All these details and combinations make the Draggin' Ned the ultimate jig head for finesse standup approaches with 4-10lb lines.

HARPAX INSHORE

The BKK Harpax Inshore is a short shank 2x-wire HD jighead equipped with corrosion-resistant Bright-Tin coating developed to be used primarily in saltwater environments. The straight point delivers immediate hook-ups, while the bait keeper is designed to fit most kinds of soft plastic baits including scented, floating or sinking baits whose plastic blend may vary significantly. It features an eyelet on the bottom of the head to upgrade it with a teaser blade, an additional treble hook or a stinger.

ALL PURPOSE J HOOKS

HAKU LIVEBAIT

The BKK Haku Livebait is specifically designed for dead and live-bait fishing. A long shank, in-turned hook point and accurate forging delivers the ultimate hook for targeting big reef dwelling blue-water species such as Yellowtail Kingfish, Amberjack, Coral Trout and Snapper. The Bright Tin coating provides exceptional corrosion resistance, helping to keep the hook razor sharp in harsh saltwater environments.

BIG BAIT NEW

The BKK BIG BAIT is an offset all-round bait fishing hook featuring a medium gauge and a wide bend to accommodate larger baits. Its SS finish and needle point provide excellent penetration ability and the forged shank increases the strength of the hook. The 45-degree up-turned eye favours a more effective snelling, ensuring the correct penetration angle when setting the hook.

BKK ALLROUNDER-SS NEW

The BKK ALLROUNDER-SS is a light-wire hook developed expressly for light approaches and livelier presentations of the bait. Strong enough to withstand the incredible power of each fish without compromising the ability to offer a lightweight presentation, this is the ideal hook for targeting steelhead in the streams and salmon in salt water. Also excellent for baiting nightcrawlers and minnows for walleye, bass, panfish and for rigging crabs, shrimp and blood worms when targeting inshore species like snook, seatrout and drum. An offset point and SS coating ensure superior hooking performance and holding power.

CIRCLE HOOKS

MONSTER CIRCLE

BKK's Monster Circle hooks are specifically developed to target the strongest saltwater species. It features BKK's Ultra-antirust coating that ensures a superb saltwater corrosion performance and a super durable and sticky-sharp needle hook point for excellent penetration performance. Additionally, the inline hook point design ensures a jaw corner hook up, being for this reason ideal for C&R. These hooks are simply a must-have when targeting extremely big fish.

MONSTER CIRCLE DRIFTING SPECIAL

BKK Monster Circle Drifting Special is specifically developed for drift fishing tackling massive saltwater species. The hook is designed with a straight eye and an in-line hook point that make it very versatile, as it can be used to tackle various kind of blue water species such as tuna, king fish and sharks. When drifting, the stainless-steel ball bearing swivels with ultra-smooth dual rotation absorb all torsional forces and avoid tangles. BKK's signature Hand Ground hook point delivers superb impaling power and minimizes piercing resistance, increasing the hook up ratio. It is the go-to hook when targeting some of the world's largest fish.

SS INLINE HEAVY CIRCLE

The BKK SS Inline Heavy Circle is a tough and versatile tournament-approved hook providing a high hook up rate on the jaw or lip. It features the Super Slide coating to boost the piercing speed, resulting in faster and smoother hook ups and easing the sliding of live bait onto the hook. It also features a very sharp needle point out of the package.

TOURNAMENT CIRCLE NEW

The BKK Tournament Circle Light Wire features a wide gap and a super slick SS coating that enhances the penetration performance, easing the sliding of the bait onto the hook and delivering the best hooked-to-landed ratio when live bait trolling for bill fish and other saltwater species. In addition to the circle hook design, the inline point keeps the hook from catching the gut cavity or throat, making it ideal for catch-and-release and qualifying it as tournament approved.

ACCESSORIES

A selected range of accessories to complement almost every type of lure fishing application. Split rings, assist cords, snaps and more tested in harsh fishing conditions, developed to last and to be relied upon.

SPLIT RING-51

BKK Split Rings-51 are produced from high quality stainless steel to avoid rust. Precision forging and tempering optimize strength and elasticity. Fine chemical polishing smoothens any angles to prevent line damage.

STAINLESS BB SWIVEL

BKK stainless BB swivel are made in high quality stainless steel to resist rust and corrosion. Precise punching allows to shrink the wire section without affecting the strength and elasticity required to fight big prey. Line damage is avoided by a thorough polishing of all surfaces and torsions are prevented by the smooth spinning mechanism of the swivel.

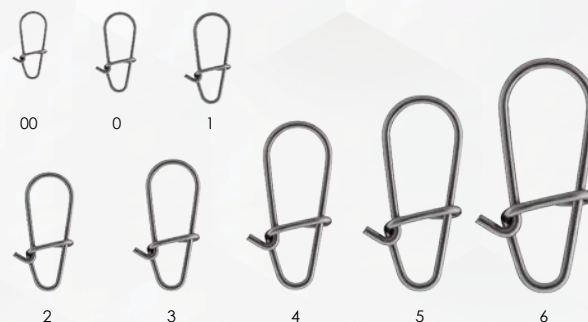

SKU NO	Strength (lb)	Size	Qty	Color	PKG

IWS LEAD

Featured in the Titan Diver+, these leads are used to change the swimming action and the swimming depth of your weedless rig according to the fishing conditions. Replacing these leads on the shank of the Titan Diver+ is extremely easy and intuitive, allowing for many swimming options with the same weedless hook.

They come equipped with the silicon pins needed to secure them onto the hook.

SKU NO	Weight (oz)	Qty	Color	PKG
D-LD-1008	1/4	2	Lead	10
D-LD-1012	7/16	2

D-LD-1032	1-1/8	2		
D-LD-1042	1-1/2	2		

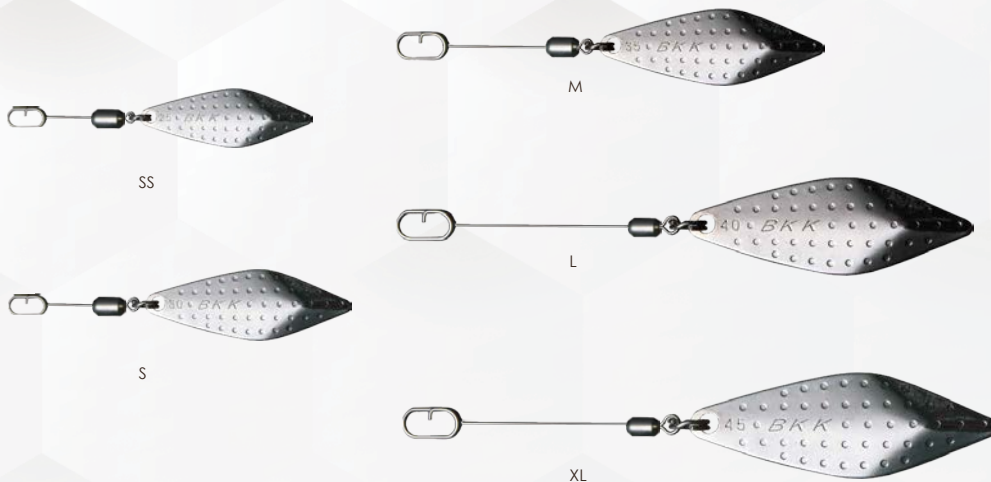

TEASER BLADE WS1

The BKK Teaser Blade WS1 is designed to boost your weedless presentation using the Titan Diver and the Titan Diver+. We chose a slimmer profile compared to most of the blades on the market to minimize the chance of snags, at the same time maintaining a smooth spinning action. Enticing flashes are boosted by the hammered finish of the blade's surface. The connection system lastly is super easy, allowing for a quick and easy replacement.
