HOOK POINTS

Hand Ground

BKK Hand Ground technology enables the hook to reach unprecedented levels of penetration and lightness. This process leaves the original needle point unaltered as the grinding begins a few millimeters above the point.

- Hand ground sides form a sword blade for reduced piercing resistance.
- Lighter hook structure by grinding areas with minimal stress.
- Reinforced in critical areas to prevent bending out.

Cutting Delta

The design concepts of the Cutting Delta point originate from the formation of a military sword.

- Razor sharp tip with leading edges designed to reduce surface contact area.
- Cold forging enhances the penetration performance while strengthening the structure.

Cutting Blade

The patented design concept of the Cutting Blade was derived from the sharp teeth of a shark.

- Penetrate hard jawbone with ease by piercing through and sliding between the bony parts of a fish's mouth.
- Excels in long-range fishing techniques for bottom dwelling fish with bony mouths.

Combat Point

The design of the CP hook point resembles that of an inverted T, greatly increasing the penetration performance.

- Utilizing three edges helps aid in piercing through the hardest mouths.
- The central edge reinforces the structure and aids in its overall strength.
- Designed for long-lasting performance even after dealing with rocky bottom.

COATINGS

TREBLES

Crafted with uncompromising precision and built to help you land more fish from bass to bluefin tuna and everything in-between. BKK trebles offer unmatched strength, durability, and razor-sharp penetration, delivering a lethal combination of power and performance that sets them apart from the competition. BKK's commitment to detail and innovation becomes evident in the hand-ground treble hooks that guarantee precision, sharpness, and reliability. Whether you're a seasoned pro or an aspiring angler, you'll find the most advanced and reliable treble hooks on the market.

GT-REX

ULTRA ANTIRUST

The largest treble hook that concentrates the highest technology of BKK to serve the most extreme anglers.

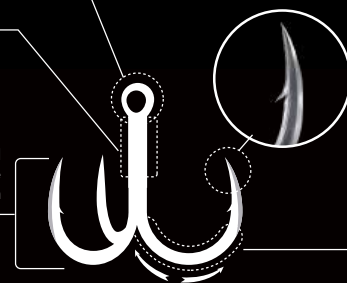

We developed the GT-REX to challenge the biggest GT and Bluefin Tuna in the world on poppers and stickbaits. The design of GT-REX emphasizes superior hook-up ratio and excellent impaling power coped with strongest wires and super anti-rust feature. Processed through the most advanced heat treatment, GT-REX uses BKK-81W/V, the strongest material from BKK, to present its superior stretch power and resilience. The hook point of GT-REX adopts BKK's finest hook point processing technology to insure its ultimate impaling power. Meanwhile, sealed hook eye and advanced anti-rust technology equip this treble with a solid and long-lasting structure.

Short welded section increases the elasticity of the hook to reduce its possibility of being pulled open.

Our fully welded Micro Ring is formed once the hook shank has undergone a special grinding process. The strength of the ring is maintained while providing a slim profile that makes attaching a split ring super easy.

Deepest hook point and widest hook gap in the industry help penetration when bite occurs.

HG point - BKK's finest hook point processing technology insures the ultimate impaling power.

Perfectly curved hook bend maximizes strength and resilience.

GT-REX's super sharp hook point goes into the deepest part of fish's mouth and impales its hard bones as soon as the fish swallows the lure.

The combination of a curved hook point and wide hook gap minimizes chances of escape.

GT-REX

The BKK GT-REX was developed to tackle massive giant trevally and tuna. The Hand Ground hook point of the GT-REX coupled with BKK's signature Ultra-AntiRust Coating ensure sustained sharpness and penetration performance. All the details of GT-REX from the hook eye to the points have been engineered to create simply the best-performing treble hook for your saltwater popping.

GT-REX BL

The GT-REX BL is developed to tackle massive giant trevally and tuna. The barbless version of the well-known GT-REX allows for an enhanced survival rate of the fish when Catch & Release. Also, fishing barbless treble hooks eyes at on-board safety when casting among other anglers: fishing charter-approved!

BKK-RAPTOR-Z

When you're going after "monsters"

BKK-RAPTOR-Z incorporates the latest hook making technology and BKK's legendary hand-crafting finishes. This is a hook that was designed with only one thing in mind: to hook strong and aggressive "monster" fish and stay hooked to the very end!

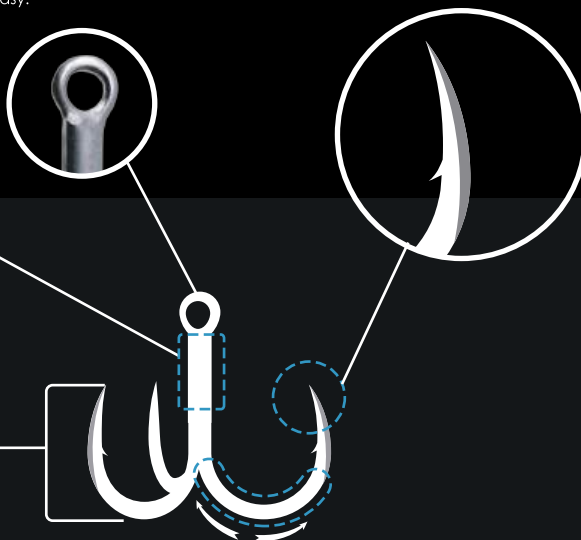

Our fully welded Micro Ring is formed once the hook shank has undergone a special grinding process. The strength of the ring is maintained while providing a slim profile that makes attaching a split ring super easy.

BKK's proud hook point processing technology insures the ultimate impaling power.

Short welded section increases the elasticity of the hook to reduce its possibility of being pulled open.

A wide gape and deep hook point design greatly reduces the chance of the hook coming off in the heat of combat.

Perfectly curved hook maximizes strength and resilience.

BKK-RAPTOR-Z

BKK engineers were asked to design a hook to tackle the strongest, most aggressive “Monster Fish” anyone could think of. The job requirement for a hook with not only superior impaling power and high hook-up ratio, but one that could also be super strong and highly resistant to corrosion. This is how the BKK-RAPTOR-Z came to life.

BKK-RAPTOR-X

The BKK-RAPTOR-X is a 3X-wire treble hook whose design is inspired by one of the best treble hooks BKK ever launched: the BKK-RAPTOR-Z.

The hook gap-shank proportions are maintained to equip the BKK-RAPTOR-X with excellent holding power, yet the hook point is slightly straightened to enhance the hook-up rate, further heightened by the slimmer profile of the wire and by the Hand-Ground processing technology.

Featuring a lighter wire and being available also in very small sizes, the BKK-RAPTOR-X can be suitable to arm smaller lures without affecting their swimming action. The lightness of the hook structure is increased also by the Hand-Ground processing, through which the hook is manually sharpened by removing material around the point.

The Bright-Tin coating of the BKK-RAPTOR-X aims at maximizing its performance in terms of saltwater corrosion resistance, being thereby suitable even for harsh saltwater environments.

BKK-VIPER-61

The BKK Viper-61 is an exceptionally strong 6X-wire treble hook, building on the legacy of Japan's "Good Design Award"-winning treble, the Viper-41.

Designed from years of experience with fast-swimming, diving, trolling, and surface-skipping lures from around the world, the BKK Viper-61 offers superior performance. The straight point is specifically chosen to maximize the hook-up rate when fish strike, while the aggressive bend and oversized barb ensure the hook remains secure during prolonged fights.

Additionally, the ring of the BKK Viper-61 features BKK's Slim Ring process, providing a slim profile that makes attaching a split ring effortless. The Bright Tin coating technology gives these treble hooks durable, long-lasting protection, even in the harshest saltwater environments.

BKK-VIPER-41

The BKK-Viper-41 is a strong and sharp 4x treble hook designed with long and straight needle points and a very aggressive bend.

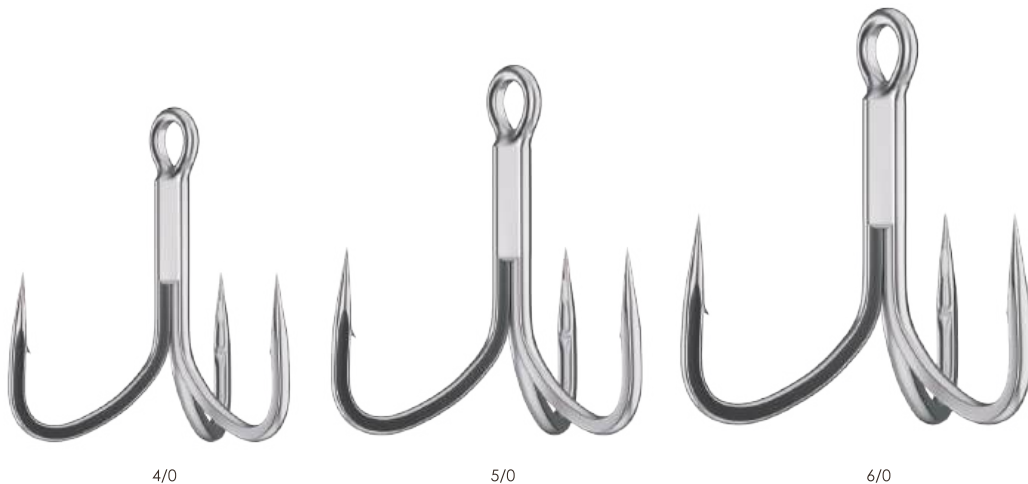

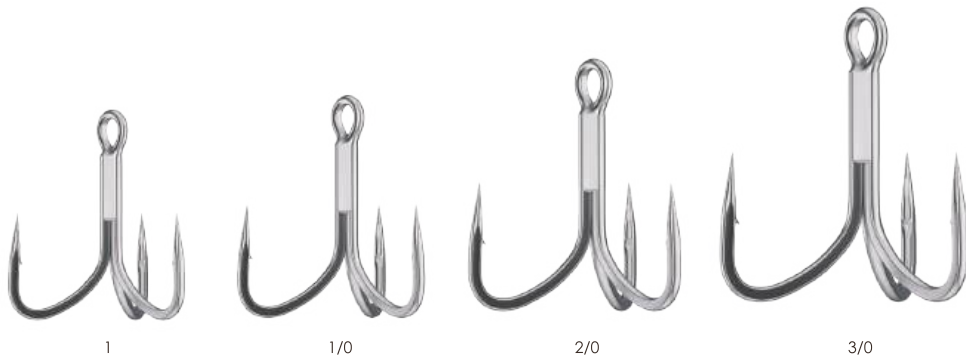

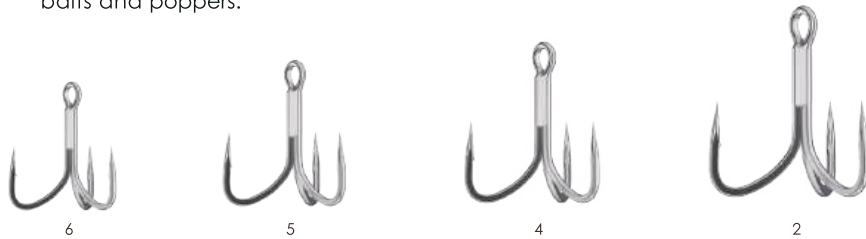

The design of the BKK-VIPER-41 stems from the experience made over the years with fast swimming diving trolling lures and surface skipping lures all around the world.

The straight point was chosen to maximize the hook-up rate when fish only hit the lure, while the aggressive shape of the bend ensures that the hook does not come off during prolonged fights or when the fish jumps out of the water.

To reduce the overall weight of the hook we shortened the welded section of the treble, thereby also providing more flexibility to the structure without affecting the overall strength.

The BKK-Viper-41 is coated in Bright Tin to resist even harsh saltwater environments and comes in a wide size range (6 to 6/0) to fit a huge array of lures, from small vibes to big SW stick baits and poppers.

REPLACEMENT SINGLE HOOKS

BKK's advanced manufacturing techniques ensure that each hook is precisely engineered for maximum strength, penetration, and holding power. Whether you prefer singles for their improved safety or weight savings, each hook is hand inspected to ensure you will land your next catch. Upgrade your fishing game with BKK inline single hooks, and experience the unmatched power, performance, and durability that only BKK can deliver.

BKK-LONEDIABLO BUCKTAIL TEASER HOOK

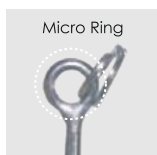

The BKK-LONEDIABLO BUCKTAIL TEASER HOOK is the ideal choice for replacing the trebles on hard baits when targeting striper, tuna, and other king size saltwater game fish. Built on 5X saltwater grade BKK-LONEDIABLO hooks, these teasers combine the dynamic motion of genuine bucktail with the flash of holographic fibers proving to drive fish wild. The binding thread is covered in epoxy resin to improve durability, even after many strikes. These teasers are not limited to just topwater baits; they make a great addition to a variety of other rigs like jigs, shallow divers, and deep divers to attract more attention to your bait.

BKK-LONEDIABLO

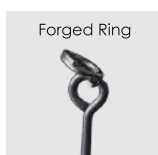

BKK-LONEDIABLO hooks have been developed to be used on lures like stickbaits and poppers. They embody all BKK's technologies and centennial experience. HG point ensures easy penetration, the unique design guarantees perfect hookset, and Bright Tin coating ensures enduring performance.

BKK developed a fabrication process for hooks carrying our Micro Ring label. Part of this process involves manual grinding before the material undergoes cold forging. The result is a strong slim ring profile that makes for easy attachment with split rings.

LONESNIPER

The BKK LONESNIPER is an inline single hook developed for freshwater and saltwater inshore applications. Features include a needle point and SS (Super Slide) coating that provides cutting-edge sharpness and penetration performance. The peculiar hook shape maximizes the hookup rate and maintains the grip throughout the fight. In addition, the BKK proprietary HCS (Hyper Carbon Steel) enables the overall structure to achieve unprecedented levels of strength.

1. FORGED RING

The Forged Ring Technology results in a smaller section that makes fitting split rings easy and quick.

2. SS COATING

The Super Slide coating increases the hook penetration performance due to the extremely low coefficient of friction the PTFE coating provides.

3. HCS - HYPER CARBON STEEL

BKK's proprietary HCS (Hyper Carbon Steel) is 25% stronger and 30% harder than traditional high-carbon steels. This enables the structure to achieve unprecedented levels of performance.

4. HOOK DESIGN

The hook design is inspired by one of the best single hooks BKK ever launched: the LONEDIABLO. The profile has been designed to optimize the hookup rate while minimizing the chance of pulled hooks.

PLUGGING SINGLE HD

SLIM
SHANK

STANDARD
BARB

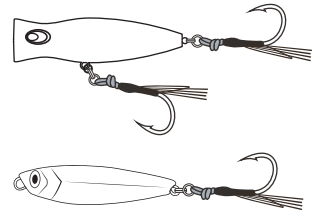

The BKK Plugging Single HD is an assist hook developed to cater to heavy-duty saltwater lure fishing and can be a performing alternative to common treble hooks, when reduction of torsional forces is most needed.

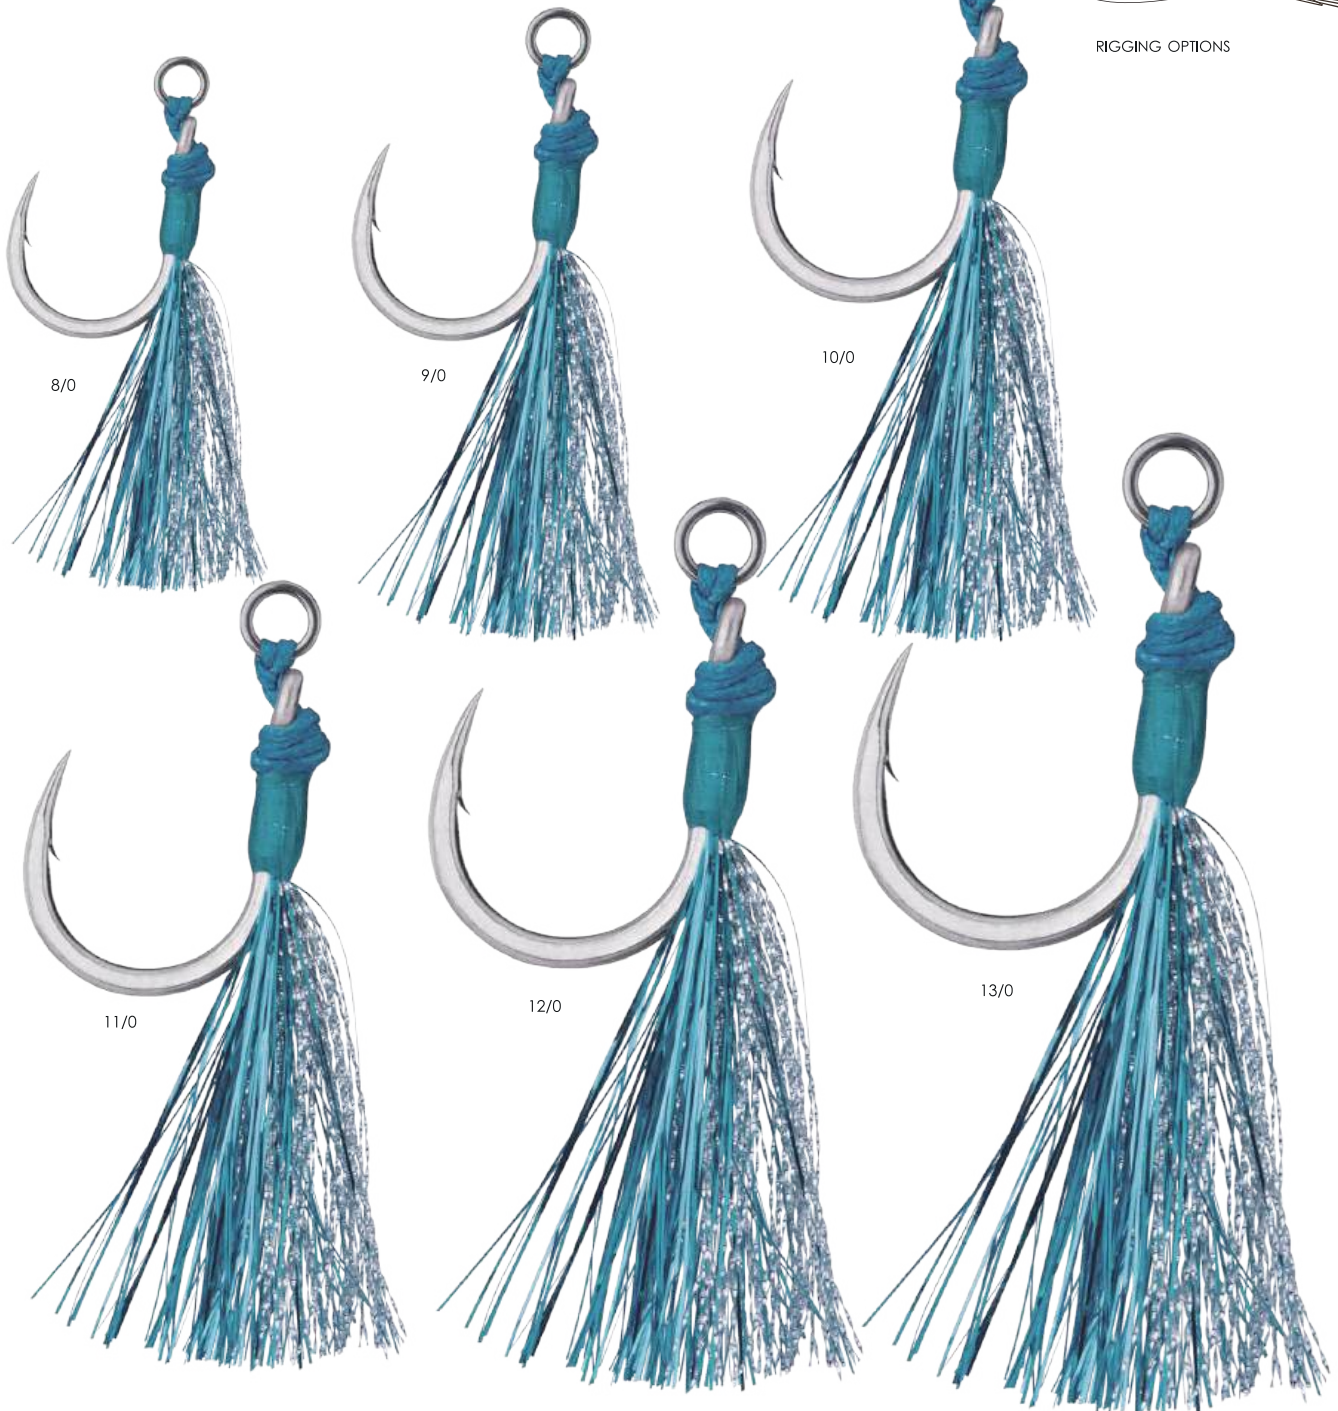

In fact, the hollow-core assist cord provides more freedom of motion to the hook, resulting in a heightened hook up ratio and lower chance of the hook coming off. Besides, the single hook causes less damage to the fish, allowing for an easy and fast release.

Additionally, shimmering fibers have been added to further enhance the attractiveness of your topwater lures. Finally, a strong in-line solid ring allows for an easy and strong connection to the split ring.

PLUGGING DOUBLE HD

The BKK Plugging Double HD is a double assist hook developed to cater to heavy-duty saltwater lure fishing and can be a viable alternative to common treble hooks when reduction of torsional forces is most needed. The hollow-core assist cord provides more freedom of motion to the hook, resulting in a heightened hook up ratio and a lower chance of the hook coming off. Suitable for rigging stick baits and poppers as well as a great assist for heavy jigging applications. The two hooks are tied individually to the ring allowing for two different presentations: hook points facing outwards for improved hook-up rate or facing inwards to reduce snags.

A close-up photograph of a fish's head and scales, with a hand holding a swimbait hook near its mouth. The fish's scales are detailed and textured, and the hook is positioned as if about to be inserted into the fish's mouth. The background is a soft, out-of-focus grey.

SWIMBAIT HOOKS

Discover BKK's Swimbait Hooks - the TitanRider, TitanDiver, and TitanDiver+. Trusted by leading lure manufacturers, these hooks are engineered for ultimate performance and durability. The TitanRider keeps shallow diving swimbaits horizontal, while the TitanDiver tracks medium-depth swimbaits smoothly, and the TitanDiver+ is perfect for deep diving swimbaits with its patented interchangeable weight system. All three feature BKK's advanced manufacturing techniques and Super Slide coating for corrosion resistance & increased penetration performance. Upgrade your swimbait game with BKK's Swimbait Hooks and experience their unbeatable strength and precision.

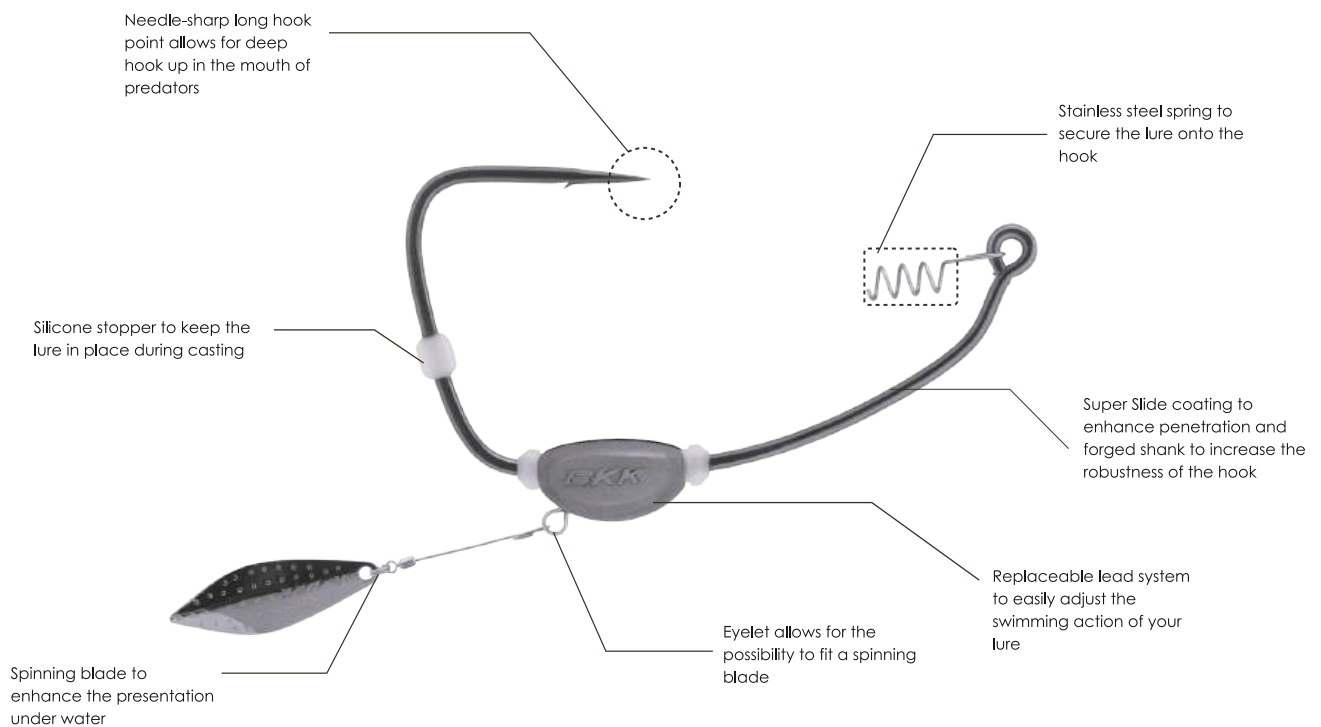

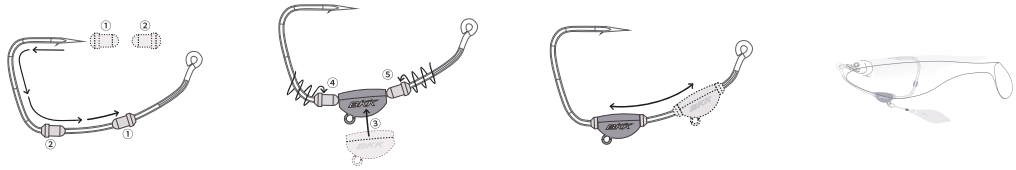

TITANDIVER+

The first member of the TITAN family was introduced just a few years ago and it soon became one of the most popular swimbait hooks for some of the biggest freshwater predator species. The fact it was bestowed the 2021 Good Design Award in Japan was a testament to the innovative features and design of the hook.

The more we used it, the more we thought about how to improve its set of features. In 2020 the TITANDIVER was born, stabilizing the swimming action and featuring a blade to enhance attractiveness.

In 2021 the latest generation of the TITAN series came to life: the TITANDIVER+, setting a whole new level for weedless lure fishing, from bass to bigger fresh and salt-water predators.

TITANDIVER+

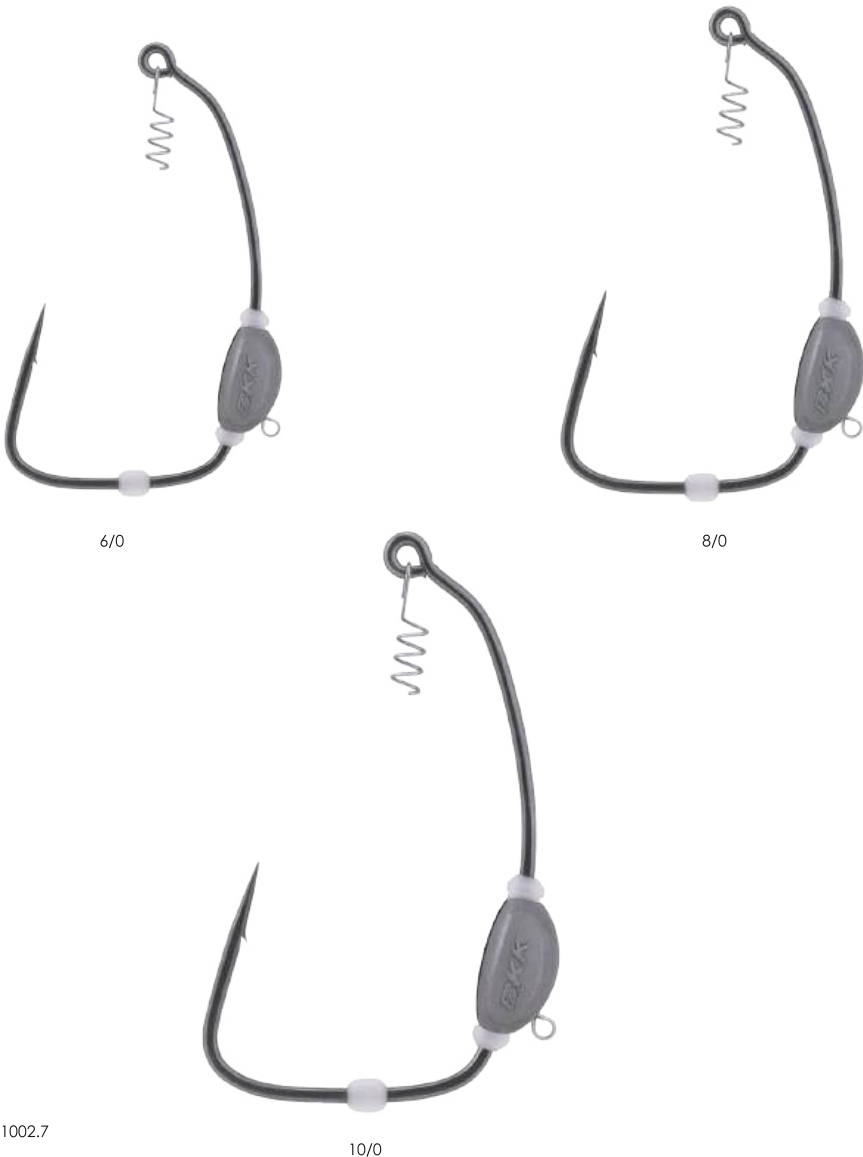

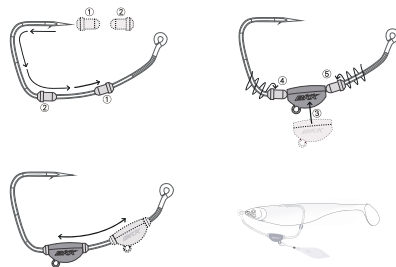

The BKK TITANDIVER+ is the ultimate evolution of the Titan series.

A breakthrough in the swimbait hook segments, the Diver+ inherits all the features of an ordinary TITANRIDER hook – Super Slide coating, needle point, spring and silicon stopper – enhanced with a simple, intuitive and effective lead – swapping system. The system offers many different combinations to add weight to your lure as the lead can slide on the shank, stimulating the creativity of anglers in adapting it to various fishing techniques and conditions.

The bottom eyelet on the weight allows for the addition of a blade to enhance the presentation of the lure.

TITANDIVER

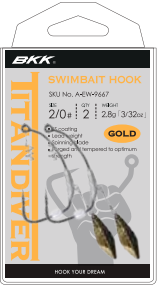

The BKK TITANDIVER is a new, upgraded version of the TITANRIDER, designed for weedless-style rigging of larger plastics. It features all the characteristics of the original TITANRIDER – a locking spring to secure the plastic lure, a silicone stopper to keep it in place and the super slide coating – boosted by the addition of a fixed lead to take the fishing action deeper in the water, scouting sunken structures where predator fish may dwell. The lead in turn features a stainless-steel ring to allow for the possible attachment of a spinning blade, improving the appeal of your lure.

TITANDIVER - GOLD

The BKK TITANDIVER is a new and upgraded version of the TITANRIDER, designed for weedless-style rigging of soft plastics. It maintains all the features of the original TITANRIDER, including a locking spring to secure the bait, a silicone stopper to keep it in place, and the Super Slide coating. In addition, it features a fixed weight that aids in presenting the lure down into the strike zone. The weight itself is equipped with a stainless-steel ring, allowing for the optional attachment of a spinning blade. The blade adds a fish-attracting flash, enhancing the appeal of the presentation. The gold color blade has been added to the lineup for its excellent visibility in low light conditions and stained/muddy water. Silver is better suited for brighter conditions and clearer water.

TITANRIDER

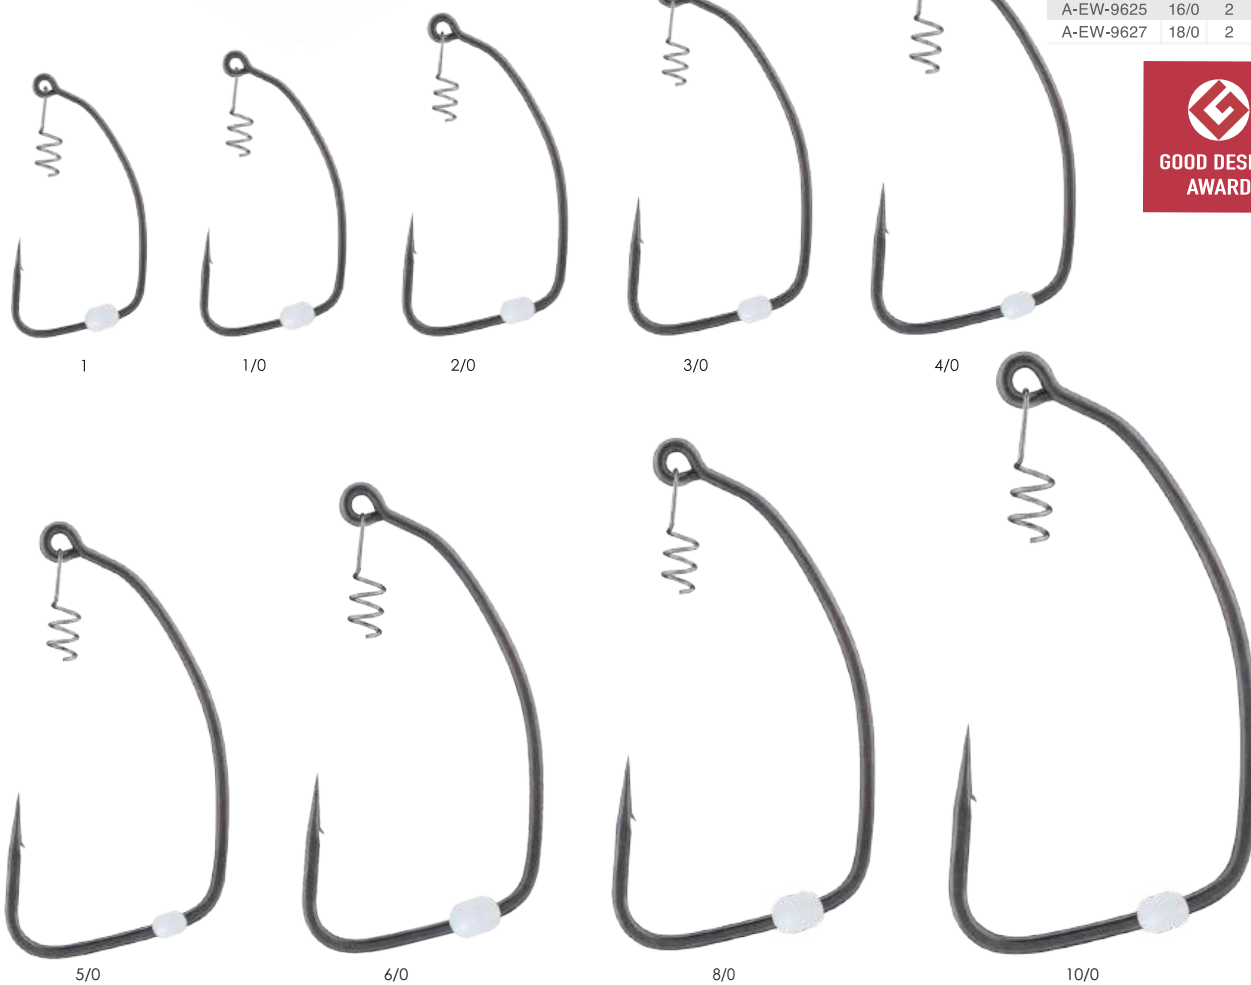

BKK TITANRIDER is designed for weedless-style rigging of small to large plastics like swimbaits, worms and tubes. A locking spring securely holds baits in place and allows angler to easily add or remove bait without damage.

The adjustable silicone stopper keeps soft plastics in place during casting whilst allowing for sliding down the hook when a fish strikes.

CIRCLE HOOKS

Designed with catch and release in mind, the lineup of BKK's circle hooks excel at providing a high hookup ratio while minimizing the risk of injury to the fish. With sizes ranging from #12 to 16/0, you can trust BKK to provide the ultimate stopping power to even the largest of fish.

MONSTER CIRCLE

FORGED

BRAZED

NEEDLE
POINT

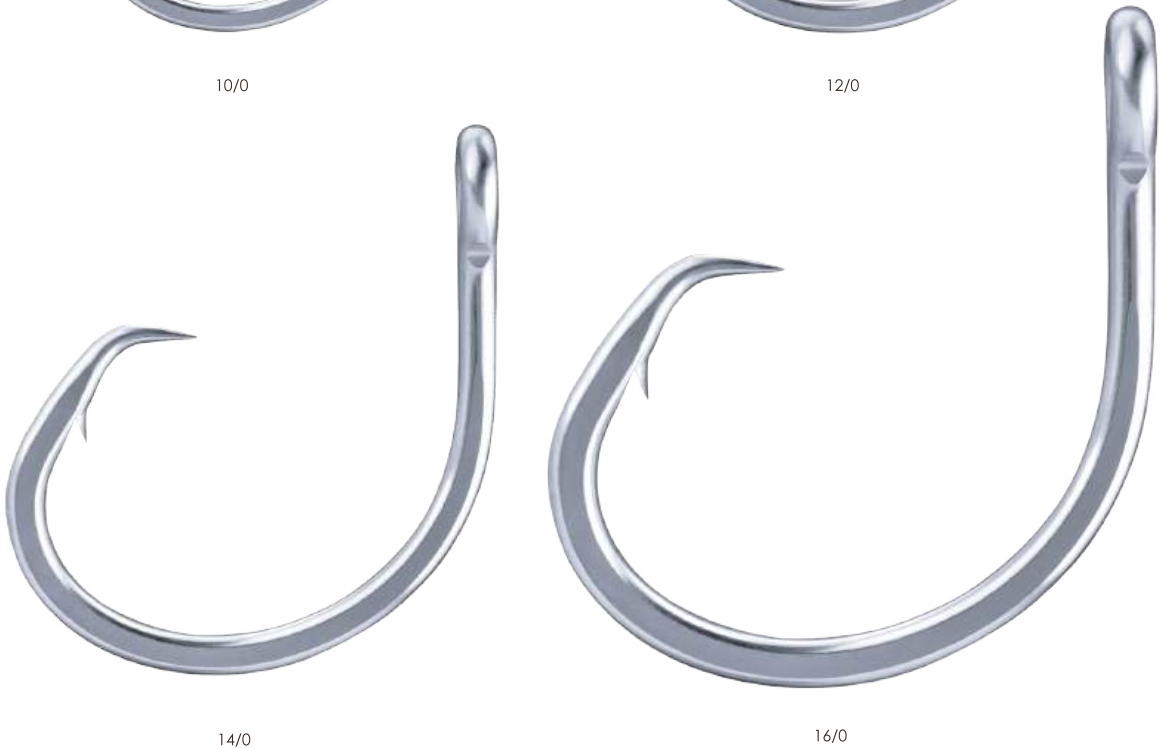

STANDARD
BARB

BKK's Monster Circle hooks are specifically developed to target the strongest saltwater species. It features BKK's Ultra-AntiRust coating that ensures a superb saltwater corrosion performance and a super durable and sticky-sharp needle hook point for excellent penetration performance. Additionally, the inline hook point design ensures a jaw corner hook up, being for this reason ideal for Catch & Release. These hooks are simply a must-have when targeting extremely big fish.

BRAZED

HAND
GROUNDSTANDARD
BARB

BKK Monster Circle Drifting Special is specifically developed for drift fishing tackling massive saltwater species. The hook is designed with a straight eye and an in-line hook point that make it very versatile, as it can be used to tackle various kind of blue water species such as tuna, king fish and sharks. When drifting, the stainless-steel ball bearing swivels with ultra-smooth dual rotation absorb all torsional forces and avoid tangles. BKK's signature Hand Ground hook point delivers superb impaling power and minimizes piercing resistance, increasing the hook up ratio. It is the go-to hook when targeting some of the world's largest fish.

COMPETITION CIRCLE-SS

FORGED

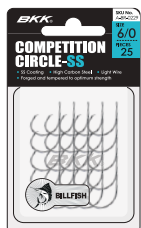

RING

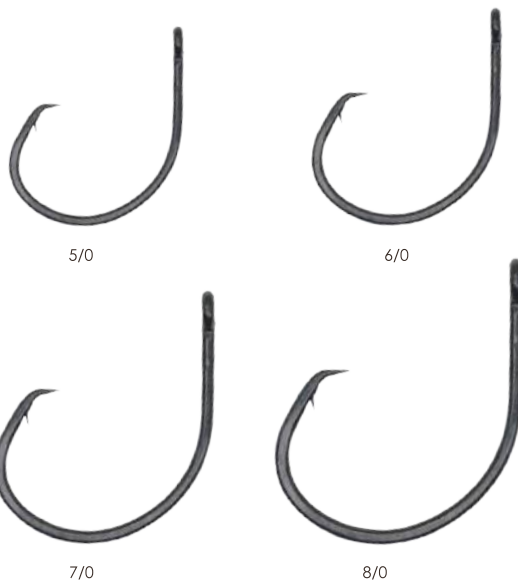

NEEDLE
POINT

STANDARD
BARB

The BKK COMPETITION CIRCLE-SS is a light wire hook that features a wide gap and a SS (Super Slide) coating that enhances the penetration performance, easing the sliding of the bait onto the hook and delivering the best hooked-to-landed ratio. It is the perfect hook for a wide range of applications ranging from drifting with live bait to trolling for bill fish. In addition to the circle hook design, the inline point keeps the hook from catching the gut cavity or throat, making it ideal for catch-and-release and qualifying it as tournament approved.

OFFSET HEAVY CIRCLE-SS

FORGED
KIRBED

RING

NEEDLE
POINT

STANDARD
BARB

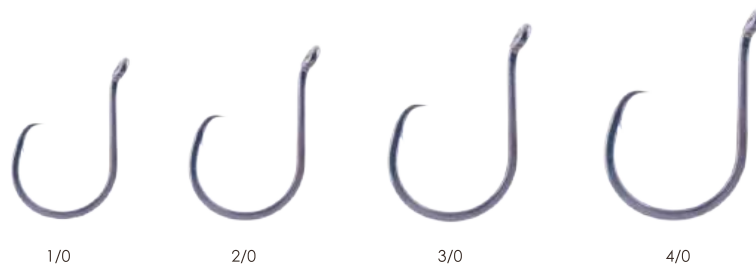

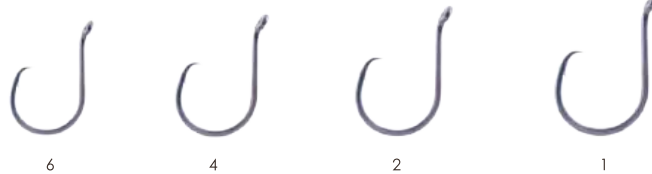

The BKK Offset Heavy Circle is an extremely versatile hook well suited for a wide variety of freshwater and saltwater fishing applications with both live baits and chunk baits.

These Circle hooks feature BKK's Super Slide coating which reduces friction for easy point penetration by simply coming tight to the fish when it takes the bait. The coating also helps ease the sliding of live baits onto the hook to help prolong their liveliness.

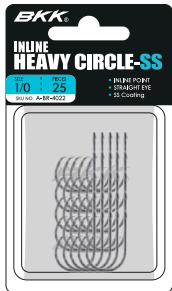

In addition to the circle hook design, the offset hook point further enhances the hook up rate by maximizing the chances of fish's self-hookups.

The high-low rig is arguably the most effective setup for catching fluke, especially when targeting larger fish around structure. Its dual-hook design creates a subtle flutter that entices strikes just off the bottom. Among the most popular bait options are curly-tail soft plastics, typically ranging from 4 to 8 inches. The 6-inch grub is a go-to size when chasing big fluke.

Equally important is selecting the right baitholder hook to keep soft plastics or strip baits securely in place. BKK's Surf Baitholder and MOTHERFLUKER hooks are top choices for this technique. Known for their strength and sharpness, they offer a size range versatile enough to match nearly any bait presentation.

KIRBED

RING

NEEDLE
POINTSTANDARD
BARB

BKK Octopus Beak is one of the most popular bait fishing hooks for both freshwater and saltwater fishing, featuring an offset hook point (reversed) that provides an enhanced hook-up rate. Its wide gap design allows for the use of bigger and bulkier baits. The black nickel finish helps to maintain the hook's sharpness and provides excellent saltwater resistance. Last but not least, the needle hook point provides excellent penetration performance. Now available with a straight-eye design for alternative rigging options.

TROLLING HOOKS

The Kajiki series of trolling hooks are geared toward blue water fishing for the world's largest and strongest fish. Whether it's high speed trolling for wahoo with the Kajiki HD, or light tackle aimed at mahi mahi, the hand ground points ensure a perfect hookup. Each Kajiki hook features welded rings, forged shanks, and are meticulously hand inspected to give the fisherman the ultimate trust to land the fish of their dream.

KAJIKI TROLLING HD

The BKK Kajiki Trolling HD is the ultimate trolling hook for billfish designed for 24kg-37kg class tackle. It features BKK's Hand Ground hook point that delivers superb penetration performance and the Bright tin coating that performs excellently in harsh saltwater environments. The perfectly welded ring and heavy-duty forged shank further enhance the strength of the hook. Kajiki Trolling HD is the go-to trolling hook when going after the world's biggest and strongest blue water species.

		3XL#	65.0	30-50	Front / Tail	15-20				

Disregarding wind and current speed, the general rule of thumb for choosing the jig is 1g per 1 ft of water (100g in 100ft of water), For those who measure the weight of the lures in ounces, the easiest way is to divide the gram weight by 30 (150g is about 5oz).

JIG SELECTION

LOW FLUTTER JIGS: Bottom or center weighted with streamline torpedo profile. Designed to get to the bottom quickly with a lot of action on the retrieve (e.g. NOMAD STREAKER).

MEDIUM FLUTTER JIGS: Center balanced and medium profile with a slightly flat back. Designed to be worked at slower to medium speeds and dart around when twitched and jigged (e.g. NOMAD GYPSEA).

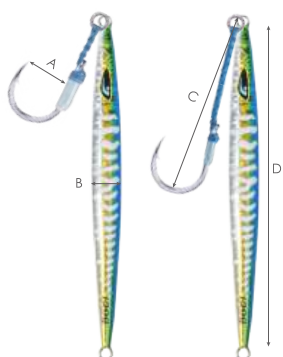

HIGH FLUTTER JIGS: Center balanced with a wide profile and a flat or spoon shaped side. Designed to wobble and flutter slowly through the water column during free fall enticing the fish to strike as the lure falls. (e.g. NOMAD BUFFALO).

ASSIST PAIRING

GENERAL SPEED JIGGING

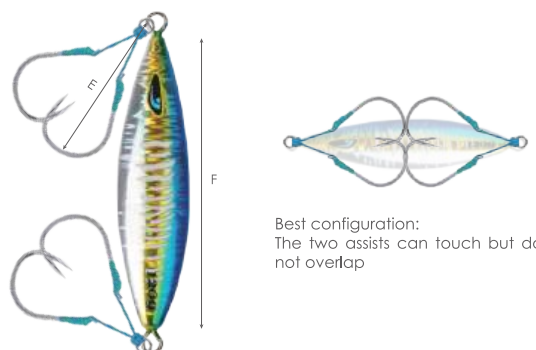

- To prevent the hook from getting stuck on the jig, the hook gap (A) should be larger than the jig width (B).
- To maximize the hookup rate the assist length (C) should cover 1/3 to 1/2 of the jig length (D).

CALIFORNIA TUNA SPEED JIGGING

SLOW JIGGING

Best configuration:
The two assists can touch but do not overlap

- For the best hook up rate, and to prevent the two assists from tangling, the length of the assist (E) should not exceed 1/2 of the length of the jig (F).

GAFF-R

LIGHT SLOW FALL

The BKK SF Gaff-R has been designed for slow jigging applications. The Delta Point technology and innovative design ensure easy hook ups, even during free fall and without main line tension.

The hooks are tied using the BKK Fluoro Core Assist Cord to minimize tangles and improve hook penetration.

Thanks to the three lengths available, SF Gaff-R can be used with all kinds of jigs.

LENTUS

HEAVY SLOW FALL

BKK SF Lentus hooks have been developed to target deep-water monsters with the slow jigging technique. For this reason they have been designed with a heavy gauge that can stop the run of a big fish and an inturned point that reduces snags, but once set in the fish mouth won't come off during the fight.

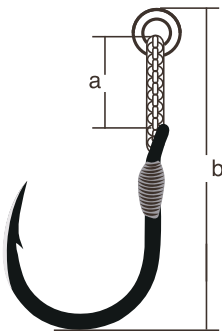

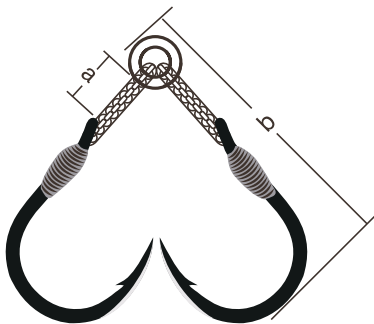

The hooks are tied using the BKK Fluoro Core Assist Cord to minimize tangles and improve hook penetration.

Thanks to the three lengths available, SF Lentus can be used with all kinds of jigs.

SF DEEP LONG

The BKK SF DEEP-HG LONG is the long assist version of BKK's meanest jigging assist, the SF DEEP-HG. It maintains all the features of the shorter model: razor-sharp Hand Ground point for improved penetration, a perfectly welded ring and forged bend for enhanced strength, slim shanks for weight reduction, tin coating for excellent saltwater corrosion resistance, and 4-strands braided PE assist cord for long-lasting performance. The addition of the longer assist cord makes it the perfect match for longer knife jigs when fish bite short.

The BKK Plugging Single HD is an assist hook developed to cater to heavy-duty saltwater lure fishing and can be a performing alternative to common treble hooks, when reduction of torsional forces is most needed.

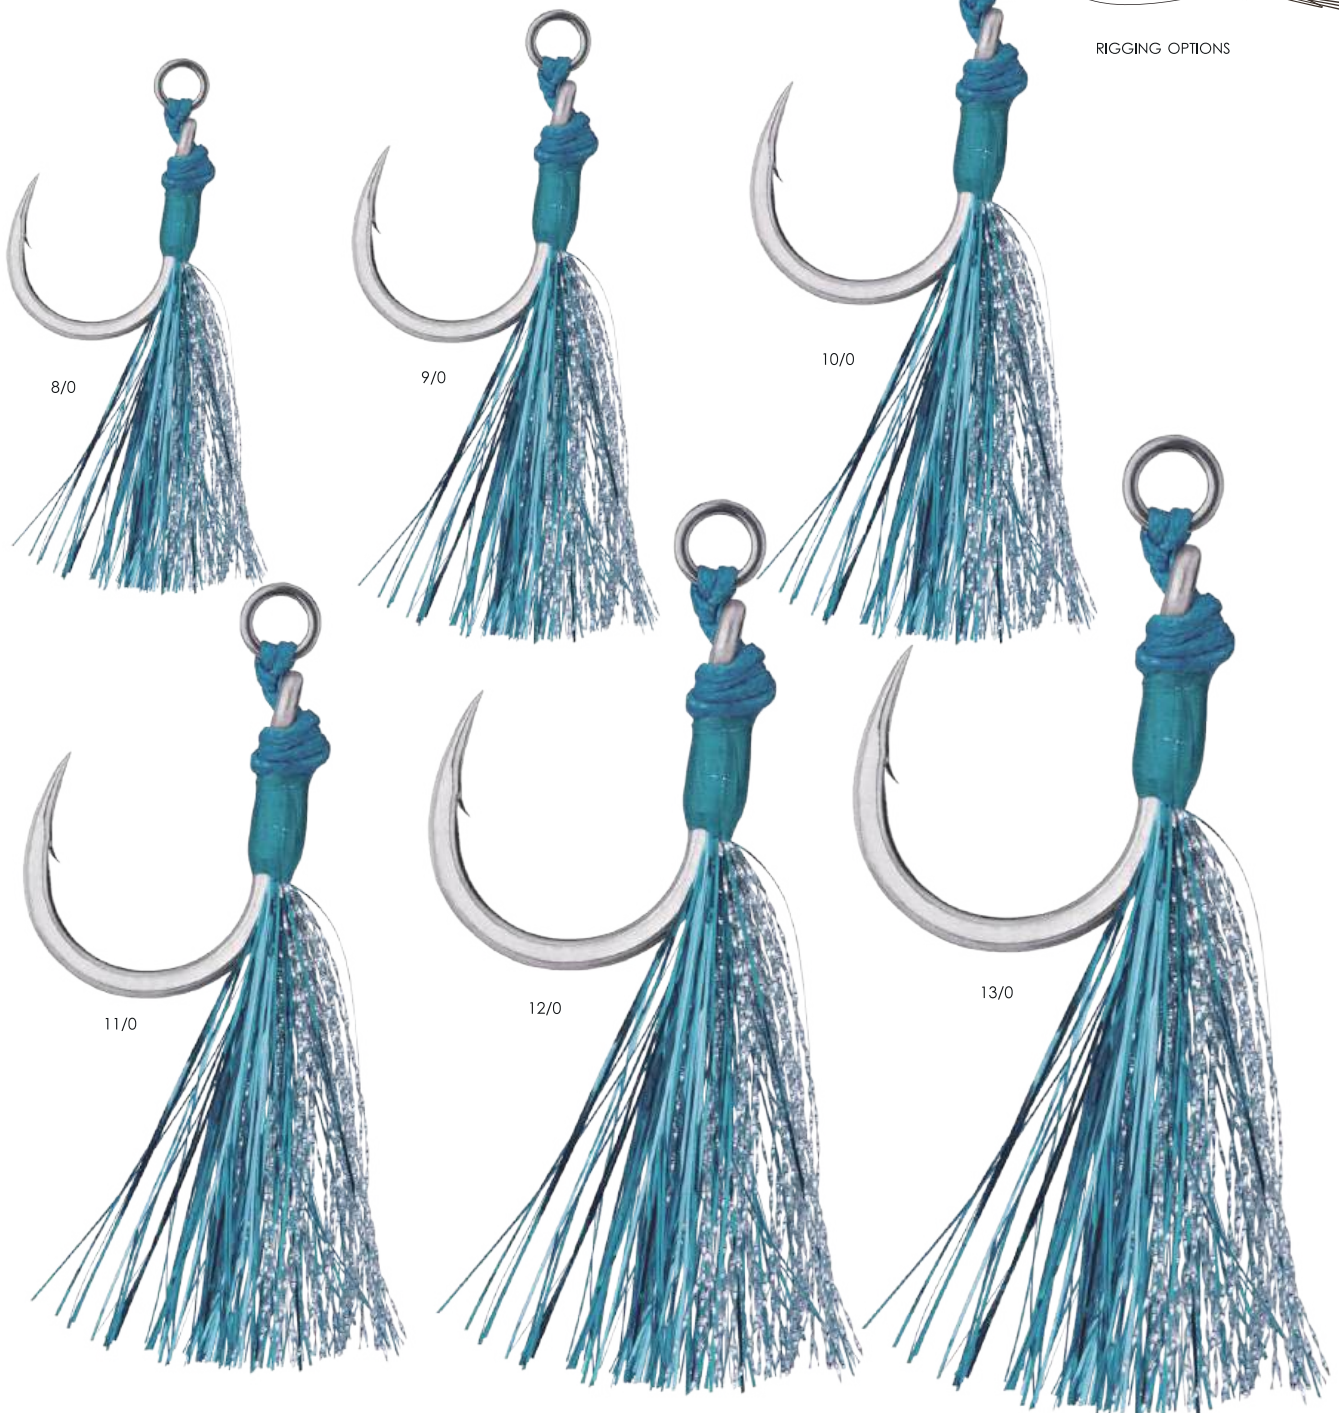

In fact, the hollow-core assist cord provides more freedom of motion to the hook, resulting in a heightened hook up ratio and lower chance of the hook coming off. Besides, the single hook causes less damage to the fish, allowing for an easy and fast release.

Additionally, shimmering fibers have been added to further enhance the attractiveness of your topwater lures. Finally, a strong in-line solid ring allows for an easy and strong connection to the split ring.

The BKK Plugging Double HD is a double assist hook developed to cater to heavy-duty saltwater lure fishing and can be a viable alternative to common treble hooks when reduction of torsional forces is most needed. The hollow-core assist cord provides more freedom of motion to the hook, resulting in a heightened hook up ratio and a lower chance of the hook coming off. Suitable for rigging stick baits and poppers as well as a great assist for heavy jigging applications. The two hooks are tied individually to the ring allowing for two different presentations: hook points facing outwards for improved hook-up rate or facing inwards to reduce snags.
