# **HOOK POINTS**

### **Hand Ground**

BKK Hand Ground technology enables the hook to reach unprecedented levels of penetration and lightness. This process leaves the original needle point unaltered as the grinding begins a few millimeters above the point.

- · Hand ground sides form a sword blade for reduced piercing resistance.
- · Lighter hook structure by grinding areas with minimal stress.
- · Reinforced in critical areas to prevent bending out.

### **Cutting Delta**

The design concepts of the Cutting Delta point originate from the formation of a military sword.

- Razor sharp tip with leading edges designed to reduce surface contact area.
- Cold forging enhances the penetration performance while strengthening the structure.

### **Cutting Blade**

The patented design concept of the Cutting Blade was derived from the sharp teeth of a shark.

- · Penetrate hard jawbone with ease by piercing through and sliding between the bony parts of a fish's mouth.
- Excels in long-range fishing techniques for bottom dwelling fish with bony mouths.

### **Combat Point**

The design of the CP hook point resembles that of an inverted T, greatly increasing the penetration performance.

- · Utilizing three edges helps aide in piercing through the hardest mouths.
- The central edge reinforces the structure and aids in its overall strength.
- Designed for long-lasting performance even after dealing with rocky bottom.

# ULTRA ANTIRUST

The largest treble hook that concentrates the highest technology of BKK to serve the most extreme anglers.

We developed the GT-REX to challenge the biggest GT and Bluefin Tuna in the world on poppers and stickbaits. The design of GT-REX emphasizes superior hook-up ratio and excellent impaling power coped with strongest wires and super anti-rust feature. Processed through the most advanced heat treatment, GT-REX uses BKK-81 W/V, the strongest material from BKK, to present its superior stretch power and resilience. The hook point of GT-REX adopts BKK's finest hook point processing technology to insure its ultimate impaling power. Meanwhille, sealed hook eye and advanced anti-rust technology equip this treble with a solid and long-lasting strucure.

Our fully welded Micro Ring is formed once the hook shank has undergone a special grinding process. The strength of the ring is maintained while providing a slim profile that makes attaching a split ring super easy.

HG point - BKK's finest hook point processing technology insures the ultimate impaling power.

widest hook gap in the industry help penetration when bite occurs.

Perfectly curved hook bend maximizes strength and resilience.

GT-REX's super sharp hook point goes into the deepest part of fish's mouth and impales its hard bones as soon as the fish swallows the lure.

The combination of a curved hook point and wide hook gap minimizes chances of escape.

### **GT-REX**

The BKK GT-REX was developed to tackle massive giant trevally and tuna. The Hand Ground hook point of the GT-REX coupled with BKK's signature Ultra-Antirust Coating ensure sustained sharpness and penetration performance. All the details of GT-REX from the hook eye to the points have been engineered to create simply the best-performing treble hook for your saltwater popping.

A-ET-6766

The BKK-RAPTOR-X is a 3X-wire treble hook whose design is inspired by one of the best treble hooks BKK ever launched: the BKK-RAPTOR-Z.

The hook gap-shank proportions are maintained to equip the BKK-RAPTOR-X with excellent holding power, yet the hook point is slightly straightened to enhance the hook-up rate, further heightened by the slimmer profile of the wire and by the Hand-Ground processing technology.

Featuring a lighter wire and being available also in very small sizes, the BKK-RAPTOR-X can be suitable to arm smaller lures without affecting their swimming action. The lightness of the hook structure is increased also by the Hand-Ground processing, through which the hook is manually sharpened by removing material around the point.

The Bright-Tin coating of the BKK-RAPTOR-X aims at maximizing its performance in terms of saltwater corrosion resistance, being thereby suitable even for harsh saltwater environments.

	Q

1

# **BKK-VIPER-41**

The BKK-Viper-41 is a strong and sharp 4x treble hook designed with long and straight needle points and a very aggressive bend.

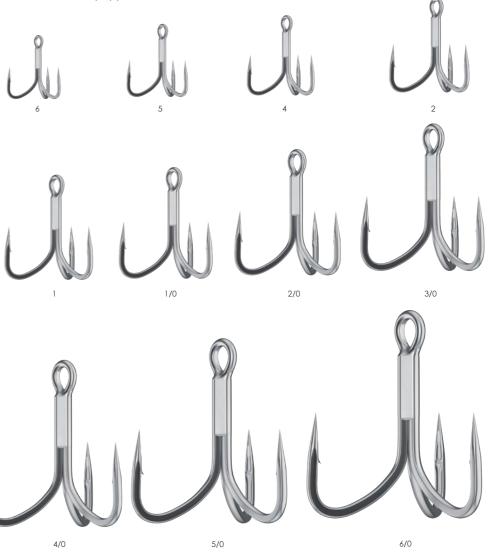

The design of the BKK-VIPER-41 stems from the experience made over the years with fast swimming diving trolling lures and surface skipping lures all around the world.

The straight point was chosen to maximize the hook-up rate when fish only hit the lure, while the aggressive shape of the bend ensures that the hook does not come off during prolonged fights or when the fish jumps out of the water.

To reduce the overall weight of the hook we shortened the welded section of the treble, thereby also providing more flexibility to the structure without affecting the overall strength.

The BKK-Viper-41 is coated in Bright Tin to resist even harsh saltwater environments and comes in a wide size range (6 to 6/0) to fit a huge array of lures, from small vibes to big SW stick baits and poppers.

# SPEAR-21 SS

The BKK Spear-21 SS features BKK's Super Slide coating and needle hook points

# **FEATHERED SPEAR 21-SS**

The BKK Feathered Spear 21-SS features natural feathers and reflective fibers to enhance the presentation of the lure. When added to the back of a topwater bait, crankbait or spoon, they undulate and spread when pausing, enticing more strikes imitating a minnow's tail movement. The treble is our extensively-tested Spear 21-SS featuring a SS coating and needle point for excellent penetration. Feathers come in two different combinations: white and black/red. Binding thread is covered in epoxy resin to improve durability even after many strikes. Sizes range from 1 to 8 to cover a good range of lure sizes.

The SPEAR EWG-71 SS is a 1X-strength treble hook specially designed to be equipped on crankbaits of all types. The shorter shank enables this hook to sit closer to the body of your lure, minimizing the impact on its swimming action and the chances of snagging. The inward-looking points and the EWG (Extra Wide Gap) design reduces the chance of pulled hooks without affecting the hook-up rate. The SPEAR EWG-71 SS features BKK's signature SS coating that ensures smooth hook-ups and maintains the hooks' sharpness over time.

### **BKK-LONEDIABLO**

BKK-LONEDIABLO hooks have been developed to be used on lures like stickbaits and poppers. They embody all BKK's technologies and centennial experience. HG point ensures easy penetration, the unique design guarantees perfect hookset, and Bright Tin coating ensures enduring performance.

BKK developed a fabrication process for hooks carrying our Micro Ring label. Part of this process involves manual grinding before the material undergoes cold forging. The result is a strong slim ring profile that makes for easy attachment with split rings.

The BKK LONESNIPER is an inline single hook developed for freshwater and saltwater inshore applications. Features include a needle point and SS (Super Slide) coating that provides cutting-edge sharpness and penetration performance. The peculiar hook shape maximizes the hookup rate and maintains the grip throughout the fight. In addition, the BKK proprietary HCS (Hyper Carbon Steel) enables the overall structure to achieve unprecedented levels of strength.

### 1. FORGED RING

The Forged Ring Technology results in a smaller section that makes fitting split rings easy and quick.

The Super Slide coating increases the hook penetration performance due to the extremely low coefficient of friction the PTFE coating provides.

### 3. HCS - HYPER CARBON STEEL

BKK's proprietary HCS (Hyper Carbon Steel) is 25% stronger and 30% harder than traditional high-carbon steels. This enables the structure to achieve unprecedented levels of performance.

### 4. HOOK DESIGN

The hook design is inspired by one of the best single hooks BKK ever launched: the LONEDIABLO. The profile has been designed to optimize the hookup rate while minimizing the chance of pulled hooks.

### **PLUGGING** SINGLE HD

The BKK Plugging Single HD is an assist hook developed to cater to heavy-duty saltwater lure fishing and can be a performing alternative to common treble hooks, when reduction of torsional forces is most needed.

In fact, the hollow-core assist cord provides more freedom of motion to the hook, resulting in a heightened hook up ratio and lower chance of the hook

coming off. E	Besides, the s	single hook	causes I	less dam	nage to th	e fish, allov	ving

The BKK Plugging Double HD is a double assist hook developed to cater to heavy-duty saltwater lure fishing and can be a viable alternative to common treble hooks when reduction of torsional forces is most needed. The hollow-core assist cord provides more freedom of motion to the hook, resulting in a heightened hook up ratio and a lower chance of the hook coming off. Suitable for rigging stick baits and poppers as well as a great assist for heavy jigging applications. The two hooks are tied individually to the ring allowing for two different presentations: hook points facing outwards for improved hook-up rate or facing inwards to reduce snags.

# **TITANDIVER+**

The first member of the TITAN family was introduced just a few years ago and it soon became one of the most popular swimbait hooks for some of the biggest freshwater predator species. The fact it was bestowed the 2021 Good Design Award in Japan was a testament to the innovative features and design of the hook.

The more we used it, the more we thought about how to improve its set of features. In 2020 the TITANDIVER was born, stabilizing the swimming action and featuring a blade to enhance attractiveness.

In 2021 the latest generation of the TITAN series came to life: the TITANDIVER+, setting a whole new level for weedless lure fishing, from bass to bigger fresh and salt-water predators.

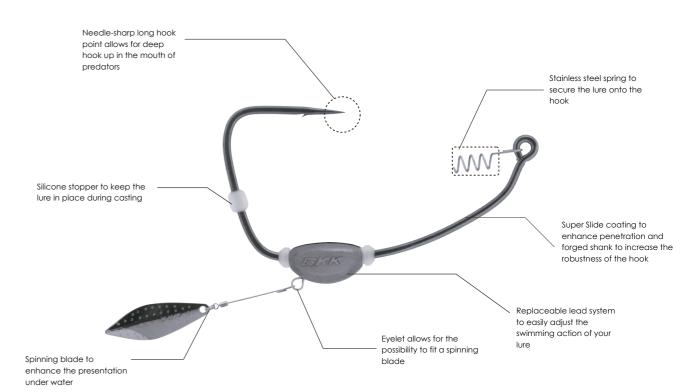

# **TITANDIVER+**

The BKK TITANDIVER+ is the ultimate evolution of the Titan series.

A breakthrough in the swimbait hook segments, the Diver+ inherits all the features of an ordinary TITANRIDER hook – Super Slide coating, needle point, spring and silicon stopper – enhanced with a simple, intuitive and effective lead – swapping system. The system offers many different combinations to add weight to your lure as the lead can slide on the shank, stimulating the creativity of anglers in adapting it to various fishing techniques and conditions.

The bottom eyelet on the weight allows for the addition of a blade to enhance the presentation of the lure.

10/0

The BKK TITANDIVER is a new, upgraded version of the TITANRIDER, designed for weedless-style rigging of larger plastics. It features all the characteristics of the original TITANRIDER – a locking spring to secure the plastic lure, a silicone stopper to keep it in place and the super slide coating - boosted by the addition of a fixed lead to take the fishing action deeper in the water, scouting sunken structures where predator fish may dwell. The lead in turn features a stainless-steel ring to allow for the possible attachment of a spinning blade, improving the appeal of your lure.

Designed to reach deeper spots, the TITANDIVER also comes equipped with a spinning blade for extra

vibration and visibility, adding enticing glare to your lure presentation.

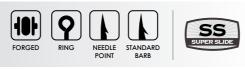

# TITANDIVER-GOLD @

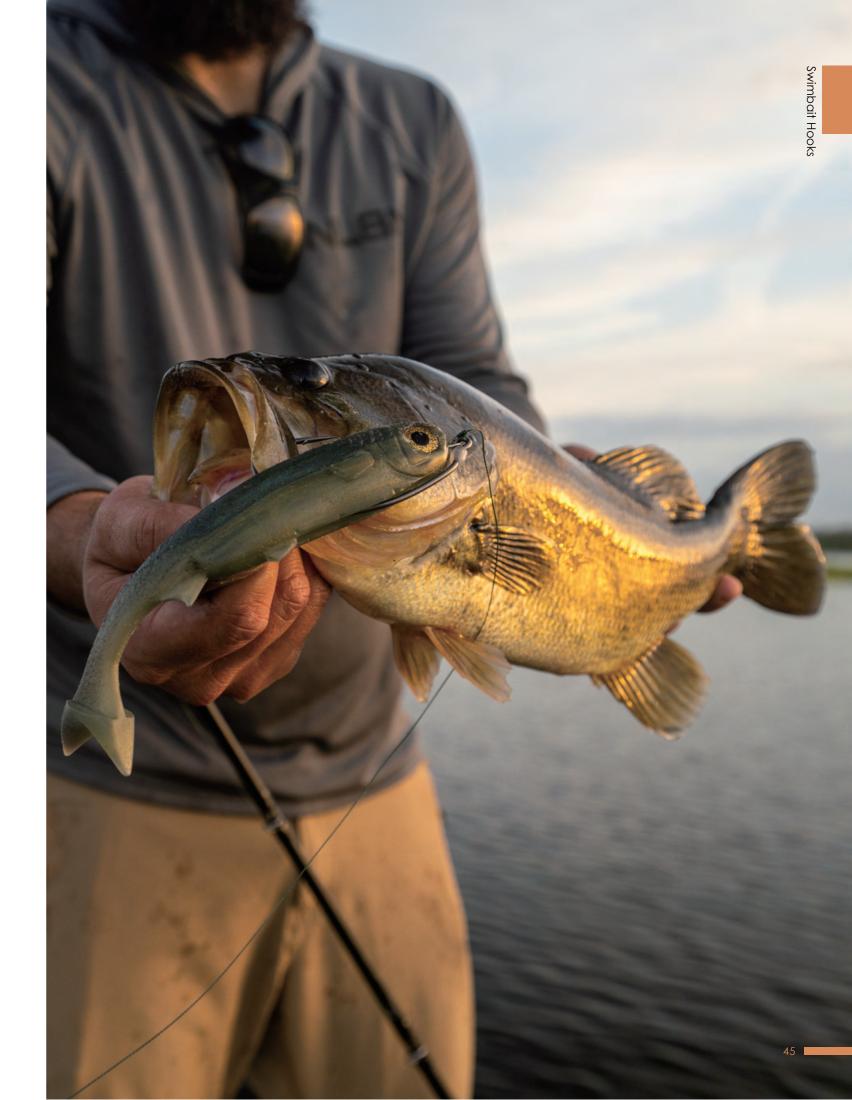

The BKK TITANDIVER is a new and upgraded version of the TITANRIDER, designed for weedless-style rigging of soft plastics. It maintains all the features of the original TITANRIDER, including a locking spring to secure the bait, a silicone stopper to keep it in place, and the Super Slide coating. In addition, it features a fixed weight that aids in presenting the lure down into the strike zone. The weight itself is equipped with a stainless-steel ring, allowing for the optional attachment of a spinning blade. The blade adds a fish-attracting flash, enhancing the appeal of the presentation. The gold color blade has been added to the lineup for its excellent visibility in low light conditions and stained/muddy water. Silver is better suited for brighter conditions and clearer water.

### **HEAVY COVER**

A-EW-9712 3/0 4

A-EW-9714 5/0 4

A-EW-9713 4/0 4 10

The BKK Heavy Cover is developed for flipping and punching techniques. This hook is equipped with an SS finish and an extra-short needle point to ensure an excellent penetration performance and an improved point strength. A special higher-carbon steel material is used to enhance wire stiffness, coupled with a forged shank to enhance hook robustness. The stainless steel baitkeeper provides consistently straight rigging and superior holding power, and is covered in epoxy resin for improved durability. Epoxy resin finish is also applied to seal the hook eye, ideal for tying snell knots with braided lines preventing line damage and slippage. The BKK Heavy Cover is designed to endure and perform when fishing through thick layers of grass and other heavy covers.

To achieve unprecedented levels of strength, these hooks feature BKK's proprietary **HCS** Hyper Carbon Steel that is 25% stronger and 30% harder than traditional steels.

prevent line slippage or damage. Excellent for tying snell knots with braided line.

Each hook eye is sealed with smooth epoxy resin to

To maintain its sharpness strike after strike, BKK designed an extra-short needle point that is beefy enough to not bend when piercing through the bony plates of the fish's mouth, and extremely sharp at the same time.

A prominent barb placed close to the point makes for instant penetration and helps hold the fish throughout the fight.

These hooks feature BKK's signature SS (Super Slide) coating that enhances the penetration performance, easing the hookset, and getting the hook firmly in the roof of the mouth every time.

The stainless-steel bait holder keeps baits in place flip after flip, without having to constantly monitor the condition of the soft plastic. Precisely positioned on the shank to leave the ideal amount of space from the hook eye for tying a snell knot. To avoid slipping after many strikes, each keeper is locked in place with epoxy resin.

The shank of the hook undergoes cold forging that enhances hook robustness and its ability to resist deformation.

### PREDATOR WG

1/0# 6

The BKK Predator WG is a freshwater finesse hook used for a variety of rigs such as Wacky and Dropshot, primarily for bass fishing. The wide-gap design and the Super Slide coating significantly enhance the hook-up rate, while the micro barb makes it suitable for catch and release. Despite its slim profile, the Predator WG is strong enough to fight big prey thanks to its forged

### PREDATOR WG WEEDLESS

The Predator WG Weedless is the weedless version of the original Predator WG for wacky and dropshot presentations. Featuring an SS finish and needle point for improved penetration performance and a forged shank, it is equipped with a fluorocarbon weed guard engineered to prevent the hook snagging the cover while allowing it to penetrate a fish with ease when striking. The guard is securely connected to the shank of the hook through strong binding thread further covered in epoxy-resin and will keep its shape and orientation fish after fish.

The BKK DSS-Worm is the ultimate hook for a wide range of light-line tactics as dropshot and split shot. Features include a razor sharp needle point to ensure the best strike-to-land ratio, a forged shank for increased strength, and the super slick SS coating for a smooth penetration.

# TRAILER HOOK

SKU NO Size Qty PKG

A-EW-9120 1/0 5 A-EW-9121 2/0 5 10

A-EW-9122 3/0 5

The BKK Trailer Hook is designed to fit most of the small-to-medium spinnerbaits on the market, enhancing their hook-up rate. The packaging includes silicon pins and silicon tubings to allow for several rigging options catering different fishing applications. The hook features a Super Slide coating to enhance penetration and a sticky-sharp needle point.

# DRAGGIN'NED

The BKK Draggin'Ned is designed specifically for Ned Rig presentations. Features include BKK's signature SS coating and a sharp needle point for enhanced penetration, and an O'Shaughnessy forged bend to maximize strength. We elaborated further on the concept of a classic Ned head by adding a series of details that make this jighead unique: a recessed eye to reduce snags and protect the knot when fishing over rocky bottoms, a baitkeeper designed to fit both elastomeric and standard soft bait compounds, and ribs on the underside of the head for increased sensitivity when dragging the bait on the bottom. The final touch is on the head, where size and weight specifications are embossed for easy selection. The Draggin'Ned comes in two colors: matte green pumpkin and matte black. It also comes in a weedless version featuring a nylon guard. Two sizes available (1 and 1/0), weight range 1/16 - 1/4oz. All these details and combinations make the Draggin'Ned the ultimate jig head for finesse standup approaches with 4-10lb lines.

### SILENT CHASER **GLIDE'N SHAKE**

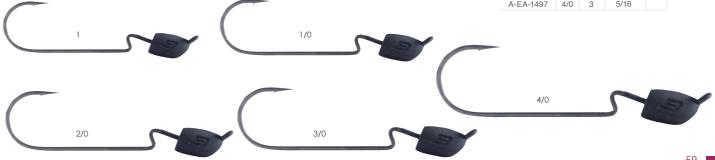

The BKK Glide'N Shake is engineered to combine both gliding and shaking presentations. The innovative bullet-head design allows for an optimal gliding action during the descent towards the bottom, and a flat surface on the front edge of the head makes it ideal for stand-up and shaking presentations once on the bottom. Hook size and weight are embossed on the head for easy selection. The hook features the SS coating and a needle point to ensure excellent penetration performance and a forged shank for improved resistance. The offset design eases Texas rigging soft plastics for a completely weedless presentation. Besides, the orientation of the hook eye reduces the chances of snagging as opposed to an inline eye which is more likely to lean on one side rather than cross over the snag.

The BKK SS Inline Heavy Circle is a tough and versatile tournament-approved hook providing a high hook up rate on the jaw or lip. It features the Super Slide coating to boost the piercing speed, resulting in faster and smoother hook ups and easing the sliding of live bait onto the hook. It also features a very sharp needle point out of the package.

# **OFFSET HEAVY CIRCLE-GLOW**

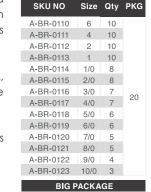

The BKK Offset Heavy Circle Glow is an extremely versatile hook developed to suit a wide variety of freshwater and saltwater fishing applications with both live baits and chunk baits, and specially eyeing at low light conditions like night fishing or deep dark waters.

The glow paint on the shank adds attractiveness and visibility to the hook, triggering the fish to bite whilst maintaining the original sharpness of the point.

In addition to the circle hook design, the offset hook point further enhances the hook up rate by maximizing the chances of fish's self-hookups.

The BKK MUTSU CIRCLE HEAVY-SS is a stronger version of the MUTSU CIRCLE MEDIUM developed for heavier offshore applications with both live baits and chunk baits. It features a super sharp offset point, which, together with the SS coating, delivers faster hookups and easier bait rigging. In addition, thanks to BKK's proprietary HCS (Hyper Carbon Steel), the hook structure is strong enough to hold big fish like bluefin and yellowfin tuna.

#### RINGED MUTSU CIRCLE MEDIUM-SS 🛷

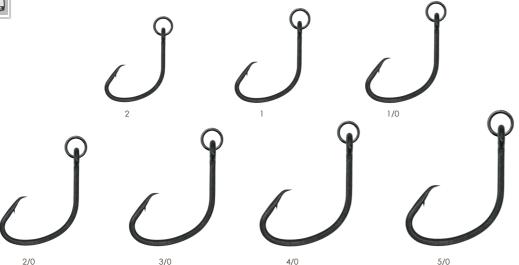

The BKK RINGED MUTSU CIRCLE MEDIUM-SS is an extremely versatile hook developed to suit a wide array of applications with live baits and chunk baits, both inshore and offshore. It features a super sharp offset point, which, together with the SS coating, delivers faster hookups and easier bait rigging. In addition, thanks to BKK's proprietary HCS (Hyper Carbon Steel), the hook structure is light enough to ensure livelier presentations of smaller baits, yet strong enough to hold big fish. The additional solid ring allows the bait fish to swim livelier and naturally enticing more bites.

The BKK Haku Livebait is specifically designed for dead and live-bait fishing. A long shank, in-turned hook point and accurate forging delivers the ultimate hook for targeting big reef dwelling blue-water species such as Yellowtail Kingfish, Amberjack, Coral Trout and Snapper. The Bright Tin coating provides exceptional corrosion resistance, helping to keep the hook razor sharp in harsh saltwater environments.

#### **ALLROUNDER-SS**

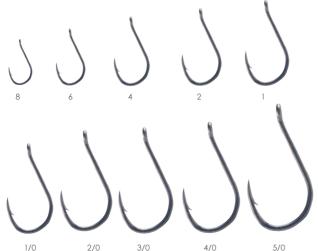

The ALLROUNDER-SS is a light-wire hook developed expressly for light approaches and livelier presentations of the bait. Strong enough to withstand the incredible power of each fish without compromising the ability to offer a lightweight presentation, this is the ideal hook for targeting steelhead in the streams and salmon in salt water. Also excellent for baiting nightcrawlers and minnows for walleye, bass, panfish and for rigging crabs, shrimp and blood worms when targeting inshore species like snook, seatrout and drum. An offset point and SS coating ensure superior hooking performance and holding power.

#### (LIGHT SLOW FALL)

BKK SF Lentus hooks have been developed to target deep-water monsters with the slow jigging technique. For this reason they have been designed with a heavy gauge that can stop the run of a big fish and an inturned point that reduces snags, but once set in the fish mouth won't come off during the fight.

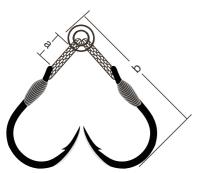

The hooks are tied using the BKK Fluoro Core Assist Cord to minimize tangles and improve hook penetration.

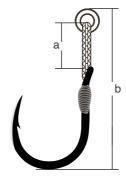

Thanks to the three lengths available, SF Lentus can be used with all kinds of jigs.

#### SF REEFMASTER HG

The BKK SF Reefmaster HG assist hook is a versatile jigging hook developed for fast jigging applications. The assist hook comes pre-tied with high-quality natural hair and glowing binding thread that help triggering more strikes even when facing tough fishing conditions.

The assist cord used is soft and extremely strong at the same time. This hook features some of BKK's best technologies including the ultra-sharp Hand Ground hook point, a perfectly welded micro ring and a bright tin coating for excellent saltwater corrosion resistance.

SF REEFMASTER NP

The concept underlying the development of BKK SF Reefmaster NP jigging assist hook is to provide anglers with a quality product equipped with a high cost-performance ratio. This assist hook comes pre-tied with a high-quality 16-braided-strand assist cord for optimum strength and flexibility.

The glow binding thread on the hook helps stimulating strikes even in low visibility conditions. The hook itself also features BKK's signature hook technologies including the micro ring technology and corrosion-resistant bright tin coating.

# SF REEFMASTER NP - LONG 🐵

The BKK SF REEFMASTER-NP LONG is the long assist version of BKK's standard SF Reefmaster-NP. It maintains all the features of the shorter model, including a razor-sharp needle point for improved penetration, a perfectly welded ring and forged bend for enhanced strength, slim shanks for weight reduction, and tin coating for excellent saltwater corrosion resistance. The longer assist cord makes it the perfect match for longer knife jigs when fish bite short.

#### **REEFMASTER NP**

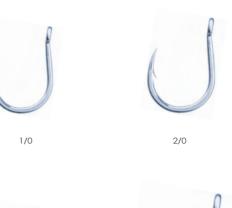

The BKK Reef Master NP is developed to be a high cost-performance ratio versatile jigging hook. A perfectly welded ring and BKK's accurate forging process enhance the overall strength of the hook structure, also reinforced by a bright tin coating providing excellent corrosion-resistant performance even in harsh saltwater environments. In order to ensure solid hook ups every time, this hook also features BKK's needle sharp hook point. Last but not least, the hook features BKK's Micro Ring technology that allows for an adequate hook eye diameter and reduces the overall weight of the hook, without affecting its structural strength.

The BKK SF DEEP-HG LONG is the long assist version of BKK's meanest jigging assist, the SF DEEP-HG. It maintains all the features of the shorter model: razor-sharp Hand Ground point for improved penetration, a perfectly welded ring and forged bend for enhanced strength, slim shanks for weight reduction, tin coating for excellent saltwater corrosion resistance, and 4-strands braided PE assist cord for long-lasting performance. The addition of the longer assist cord makes it the perfect match for longer knife jigs when fish bite short.

The BKK Deep jigging hook combines the strongest high carbon steel and superior heat treatment to achieve high strength and elasticity. It also adopts BKK's unique Hand Ground point to achieve excellence in penetration. Hook shank grinding and welding minimize the diameter of the hook shank thereby reducing the overall weight without affecting its structural strength. The high-corrosion-resistance coating enhances the durability of the

The Harpax Assist is an assist hook developed to be attached to the bottom eyelet of BKK's Harpax jigheads to convert short bites into solid hookups. Features include a razor sharp HG point to ensure the best strike-to-land ratio, a forged shank for increased strength, and the bright tin coating for a long-lasting performance. This is the ultimate assist hook for a wide range of Saltwater predators, especially eyeing at snappers.

#### STAINLESS BB SWIVEL

STAINLESS

BKK stainless BB swivel are made in high quality stainless steel to resist rust and corrosion. Precise punching allows to shrink the wire section without affecting the strength and elasticity required to fight big prey. Line damage is avoided by a thorough polishing of all surfaces and torsions are prevented by the smooth spinning mechanism of the swivel.

#### **DUOLOCK SNAP SWIVEL-51**

The BKK Duolock Snap Swivel 51 features our original Duolock Snap and a smooth-rotation stainless steel swivel to avoid torsional forces applied on the line. Thanks to the robustness of the stainless steel, even smaller swivels are equipped with remarkable strength, being able therefore to endure the pull of fairly big fish.

#### **IWS LEAD**

Featured in the Titan Diver+, these leads are used to change the swimming action and the swimming depth of your weedless rig according to the fishing conditions. Replacing these leads on the shank of the Titan Diver+ is extremely easy and intuitive, allowing for many swimming options with the same weedless hook.

They come equipped with the silicon pins needed to secure them onto the hook.

#### **TEASER BLADE WS1**

The BKK Teaser Blade WS1 is designed to boost your weedless presentation using the Titan Diver and the Titan Diver+. We chose a slimmer profile compared to most of the blades on the market to minimize the chance of snags, at the same time maintaining a smooth spinning action. Enticing flashes are boosted by the hammered finish of the blade's surface. The connection system lastly is super easy, allowing for a quick and easy replacement.

#### **SOLID CORE ASSIST CORD**

Developed specifically for Jigging applications.

The braid is made of high density, super strong fibres and has been chemically treated to resist UV light and eliminate water ingress whilst retaining its overall softness.

#### **EVA ADHESIVE FISH RULER**

The BKK EVA ADHESIVE FISH RULER is made from  $\frac{1}{4}$ " (6.5mm) closed cell EVA foam material with a brushed texture, measures up to 40" (overall dimension: 43"x 7"). The ruler can be easily adhered to any boat, deck, kayak, etc. with the aggressive 3M<sup>TM</sup> pressure sensitive adhesive. It also features routed numbers that will not fade or break down, as well as a non-skid surface to help measure slippery fish. The non-absorbent durable EVA foam allows the ruler to be wiped down with rag and cleaned easily with water and it dries quickly. Available in Grey over Black.

Grey, 43"x 7"

#### **PERFORMANCE HAT**

Black-Legacy

The new improved BKK Performance hat offers a good quality construction that fits comfortable, while light-weight breathable fabric ensures ventilation to be worn for an outdoor fishing trip. It comes in two logo combinations: BKK classic logo and legacy logo with the most sought after hook models.
